EDITORIAL PREFACE.

In addition to the tablets dated in the reigns of kings of the first dynasty of Babylon, there have been included by Dr. Poebel in the present work nine cunciform texts bearing the names of Rim-Sin and Wardi-Sin, of Larsam, which with several hundred others excavated in Nippur will constitute Volume V of Series A. Upon his application Dr. Poebel had likewise been entrusted with the publication of this volume, but unfortunately found it later impossible to carry out his original plans. In order to express their appreciation of Dr. Poebel's work done while in Philadelphia, the Committee granted him permission to include in the present publication the nine tablets referred to, reserving for themselves, however, the right of republishing them in the proper volume.

February 18, 1909.

H. V. Hilprecht.

PREFACE.

The present book has grown out of a dissertation presented in 1906 by the writer to the Faculty of Philosophy of the University of Pennsylvania, as a candidate for the degree of Ph.D., under the original title: Sechsundzwanzig Altbabylonische Rechtsurkunden aus der Zeit Hammurabis und Ammizadugus in Umschrift, Uebersetzung und Kommentar, mit 8 Kopien. Since it had been determined that the thesis should form the basis for a volume of The Babylonian Expedition of the University of Pennsylvania, I have considerably enlarged the work, the original portion of which, in the main, forms the contents of Chapter II of the present volume.

The autograph copies have been made in Philadelphia and in Constantinople in the years 1906 and 1907. In the winter of 1907 08 I collated a large number of tablets in the Berlin Museum, which I made use of in the list of date-formulas. Unfortunately my time did not allow me to complete this undertaking, nor did I, as was my purpose, have an opportunity to collate the date-formulas on tablets in the British Museum, which undoubtedly would have yielded important results. The manuscript of this volume had been completed and delivered to the Editor in May, 1908; but owing to the fact that not only the writer, but also the Editor and the Committee were absent from Philadelphia during the summer months, the printing could not begin before November, 1908.

It is a pleasant duty for me to publicly acknowledge here my heartiest thanks to those who have taken a kind interest in my studies, and who have supported me in the difficult and wearisome researches, a fruit of which is this work. I name especially the late Mr. Julius von Eichel-Streiber in Eisenach, Mr. Friedrich Georg von Eichel-Streiber in Eisenach, the *Grossherzoglich Sacchsische Staatsministerium*, Departement des Kultus, and the Provost of the University of Pennsylvania, Dr. C. C. Harrison, the founder of the Harrison Research Fellowship, the occupancy of which I have greatly enjoyed.

My sincere thanks are due also to Mr. W. L. King, for collating a number of passages on tablets in the British Museum; to his Excellency Hamdi Bey, and Dr.

X PREFACE.

Halil Bey, and to Prof. Fr. Delitzsch, for allowing me to copy and collate tablets in the Museums of Constantinople and Berlin, and besides the other members of the Publication Committee of *The Babylonian Expedition of the University of Pennsylvania*, especially to Mr. Eckley Brinton Coxe, Jr., through whose generosity the Fund has been founded and maintained which made possible the publication of this volume.

Finally I feel greatly indebted to my friend, Prof. Albert T. Clay, of the University of Pennsylvania, who undertook to revise the English portions of my manuscript, and to the Editor, Prof. H. V. Hilprecht, who by his advice and kind assistance greatly facilitated my stay in Philadelphia as well as in Constantinople.

Arno Poebel.

Eisenach, January 28, 1909.

I. INTRODUCTORY REMARKS.

Of the cunciform texts published here Nos. 1-7 and 10-69 were excavated at Nippur. They are dated in the reigns of Warad-Sin, Rim-Sin, Hammu-rabi, Samsu-duna and Ilima-ilum, and embrace a period of about eighty or ninety years. As Prof. Hilprecht informs me, they were found for the greater part in the southwest section of Mound IV (cf. the map of the ruins of Nippur in Hilprecht, B. E., Series D, Vol. I, p. 305) during the first and second expeditions of the University of Pennsylvania. There are several documents among them belonging to one and the same person (Nos. 32-35 to Abil-ilishu, Nos. 64, 66 and 68 to NinIB-rahim-sirim, Nos. 40, 47 and 58 to Enlil-izzu, Nos. 10, 14 and 30 to Mar-irsitim and Nos. 17, 21, 25 and 27 to Nabi-Shamash), from which we may conclude that the tablets were found in the houses of their owners. It is of interest to notice that the persons named in the contracts to a large extent are connected with the temple of Enlil or with the houses or small temples of other gods.¹

No. 8 (and 9?), which is dated in the reign of *Rim-Sin*, was excavated by Dr. Peters at Yokha (cf. Peters, *Nippur*, Vol. II, p. 283 ff.). While resembling the Nippur tablets in important features, it differs from them in various respects.

Nos. 69a and b, giving the seal imprints on two earlier documents from Nippur, have been added because they furnish us additional evidence for our conclusions on the burgul seals.

Of the tablets published in the Appendix, Nos. 70, 72b, 78, 80, 137 and 138 were bought by the second expedition of the University of Pennsylvania from Arabs who stated that they came from Abu-Habba and El-Birs. These statements seem to be correct; but notice that No. 80, said to have come from El-Birs, mentions Sippar as the place of payment. The other tablets are the fruit of a gleaning of the early legal documents of the Khabaza, Shemtob and Prince Collections of the University of Pennsylvania, from which Ranke already has published a selection of 119 tablets in Vol. VI, Part 1. With the exception of the undated texts,

¹ Enki and Damgaluunna, Babbar and Enlil(?), Knsu, Lugal-esh-a, Mah, Martu, Ninsun and Nusku.

² According to a slip attached to the tablet.

Nos. 137 and 138, the documents are dated in the reigns of *Hammu-rabi*, *Samsu-iluna*, *Ammi-ditana*, *Ammi-zadaga* and *Samsu-ditana*. Of a large number of tablets I have published only the date formulas, the contents of the document being either too much broken or of little interest. One of these documents (No. 130), however, which is provided with a date belonging to the time of *Ammi-zadaga*, is of great historical value, as it is a copy of a grant of land by an earlier king, who in the introductory lines enumerates his titles and his exploits. See p. 123.

The following sketches and remarks are intended to elucidate some questions connected with the contracts of the time of the first dynasty.

¹ The scribes in Nippur distinguished between the verb shāmu, "to buy", and the noun shāmu, "purchase price." As the phonetic value shām given to the latter sign in Sb, 4:3 seems to have originated from she-u-an, it is possible that the sign without a-an had some other pronunciation, perhaps she. Cf. also the complement a instead of ma in 45:4.

² For the pronunciation $g\dot{u}$ -numana compare $g\dot{u}$ -nu-mà-mà, 10:36. The closing l of mal has disappeared by first becoming manifle and finally being dropped. The l monifle is still preserved in writings like $g\dot{u}$ -nu(-um)-mà-mà-ia, C, T, II, 14:15, IV, 17:15 (cf. Ranke, P, N, p. 12, note 2) and $g\dot{u}$ -nu-mà-mà-a-u(= maiia), P, 18:13. The last furnishes a new instance for the reading of a-a as aiia. For another new example see note to Ennugi-inatia.

b. qù-nu-um-mà-mà-a mu lugal-bi in-pá(d)

The offices of the pashishu, the temple superintendent, the caterer, the doorkeeper, the court-cleaner and the stone-jar bearer (?) of the temple of Mar-tu for 2 months and 20 days in the year, the ! of Ellumushu, \(\frac{1}{3}\) sar 5 gin of built house, the long side adjoining the house of Abil-Martu; the pashishu-office and the house. the inheritance of Ellumushu, son of Silli-Shamash: from Ellumushu, son of Silli-Shamash, etc.

An analysis of the purchase documents shows that they always consist of three parts which follow each other in this order:

- A. The purchase proper; technical term: in-shi-in-sham.
- B. The payment of the purchase price; technical term: in-na-au-la(l).
- C. The agreement regarding future claims concerning the object purchased, including the oath.
 - A. The part which treats of the purchase proper gives
 - a. A description of the object bought, namely
 - 1. With reference to its character as house property, garden, field, income, etc.
- 2. When real estate is in question, as to its site, by designating one or more of the boundaries and in some cases also the landmark, etc., where the object purchased is situated.

⁴ Bal-yub-ba, the exact meaning of which is not clear, resumes the temple offices and the income attached to these. Perhaps it must be analyzed balqub-ba (or baldu-ba), "the inherited" a term which would correspond to hala-ba.

- 3. As to the owner.
 - b. Describes the transaction with the formula ki-Y- $ta \mid Z$ - $ge \mid m$ -shi-m-sham.
- B. The payment of the purchase price is in all known instances recorded by the formula, $sham\text{-}til\text{-}la\text{-}bi\text{-}sh\hat{u} = x \hat{gin} k\hat{u}\text{-}babbar = in\text{-}na\text{-}an\text{-}l\hat{u}(l)$.
- C. a. The agreement as to future claims is, that the seller, as well as his legal heirs, shall make no claim to the property in question.
- b. The oath is taken on the name of the king with the usual formula, $mu \ lugal-bi$ $in-p\acute{a}(d)$. The name of the king is never given, and besides no allusion is made to the fact that a god was invoked.

The scribes who drew up the documents made a very mechanical use of this scheme. Not only did they never change the order of the three parts and employed the same phrases, but even the succession of the single groups of words was very rigidly observed, so that the scheme took, as it were, the place of a mental formulary, into which it was only necessary to put the names of persons and objects, the numbers and measures, etc. It is unnecessary to comment upon the great advantages which such a method had for the authorities and officials.

The documents of this character from Nippur record the purchase of houses, fields and temple offices. The variations in the description of the object purchased are shown by the following:

```
a. Purchase of house: So many sar and gin é-dū-a (é-kis-laḥ) da é X¹
é Y
b. Field: So many gan a-shag.....(= species of field) shag a-shag.....(= name of the landmark)
```

saa-bi......

¹ Nevertheless we may consider it beyond doubt that Ellil, the god of Nippur, played just the same rôle in oaths as Shamash in Sippar and Larsam, Marduk in Babylon, Urash in Dilmun, i.e., that he was mentioned in close connection with the king who officiated as his plenipotentiary. Perhaps mentioning the latter made all allusion to the god superfluous. But it is also possible that lugal here designates the chief god (of a city or a person, as, c.g., Gud., Cyl. A, Col. V, l. 10), although in Semitic it is rendered by sharru (cf. No. 30:251, nîsh sharrim itmû), not bilu. But notice the expression lugal-ur-bi, which might be translated "the lord of both."

² Cf. the phrase: sham-til-la-bi-shú x gin kú-babbar in-na-an-lá(l), and the equally constant Tell Sifr formula: x gin kú-babbar sham-til-la-ni-shú in-na-lá(l).

³ A more distinct arrangement was arrived at by placing grammatical units (words or word groups) each on one line (e.g., sham-til-la-bi-shi, in-shi-in-sham), or by indenting the lines when the grammatical group covered more than one line (as especially with the kunya). A more extensive use of the indenting of lines seems to have been practised at Babylon, judging from the purchase deed C. T., VIII, 22c, where the verbs which close the divisions of the document—in-si-in-sham, in-na-an-la(l), in-pâ(d)-di-me-esh—are warped.

⁴ No. 12 adds sag-bi X₁, ki-i-bi e-sír X₂-shú.

В.

The scheme which was employed in Nippur corresponds closely to those used in other parts of Babylonia, but it shows minor characteristic differences from them, as well as these latter schemes from each other, which the following table will demonstrate

The most conspicuous grammatical peculiarities of the Nippur documents are the use of ki—ta instead of the simple ki. and the use of -a to denote the grammatical subject. Characteristics which the Nippur documents have partially in common with those from other Babylonian cities are the use of be as a determination (sham-tilla-bi-shii, i-bi-shii) instead of ni (sham-til-la-ni-shii, i-ni-shii; Tell Sifr.), the pleonastic accusative -n after infixes (in-na-an-la(l)) instead of in-na-la(l), the verbal plural ending esh instead of me-esh (Babylon, Sippar, etc.), ŭ-kùr-shù instead of ŭ-kûr-kûr (C. T., VI, 38b). Other differences arise from the different provisions as to future claims and certain ceremonies observed in other cities. In Nippur only the seller takes the oath. He alone, therefore, seems to have had the right to undo the contract, while from the fact that in Sippar and Babylon both parties swear (lù-lù-ra aù-nu-um-mà-mà-a), it would follow that the purchaser as well as the seller could exercise this privilege. The phrases shag-ga-ni al-dug, i-bi al-til and gish-kanna ib-ta-bal (Sippar, and some northern cities?) are not found in Nippur documents, and probably the custom which the last phrase describes had not existed in Nippur or had passed into disuse.

II. REDEMPTION DOCUMENTS (45, 64, 66). No. 45.

Redemption of Field Property.

A. a. 5 gan a-shay gùy-she shay a-shay ^dNin-uun us-a-rá ^dEn-lil-na-da kú-ta-sham-a² ki La-ma-zum SAL + ISHIB ^dNin-IB dumu ^dEn-lil-ma-an-sì

¹ It may be questioned whether the dropping of the postposition ta after ki must be considered as an error on the part of Semitic scribes; at least the possibility cannot be denied that the use of ki as an independent preposition was a characteristic of the local Sumerian dialects which formerly were spoken in the respective localities, and which, when no longer spoken, were handed down in schools and temple rituals.

² See note 2, on p. 3. The affixed a, the function of which it is to group the preceding ideas into a grammatical unit, and thus especially to substantivate verbal expressions, is placed here directly after kú-la-sham, although there follows still a modification by ki. In 64:6 and 66:5, however, it is placed behind the verbal modification (kú-la-sham...in-sham-a). Compare the similar positions of the temporal á in uddá inlal and ud inlalá.

and built anew," Perhaps kikal has the more special meaning of "levelled site," and ki-lab that of "cleaned, ix, cleared site," of a collapsed house.

As the walls of Babylonian houses were usually built of sun-dried bricks, with layers of reed without a wooden frame, presumably many buildings collapsed in the rainy season. The site of the old house was levelled, upon which the new house was erected. By the frequent occurrence of this process (we must remember that the city mounds have risen to a considerable height by the débris of such poorly constructed houses), it will be easily understood that kikal, etc., first received the meaning "building ground" and subsequently even that of "unbuilt ground," in distinction to é-di-a, "built ground." C. ŭ-kûr-shû nam-shutug ud-27-kam mu qû-qûl-la kishib in-na-an-tagi

A variation of the purchase deeds is represented by those documents which record the purchase of property formerly in the possession of the purchaser's family. The scheme corresponds therefore to that of the purchase documents, except that in-shi-in-sham is replaced by the technical term in-du, "he has ransomed," and that this term is given a short rationale by the addition of é ad-da-na, resp. a-shaq é adda-ni or garza é ad-da-na, which refers to the ransomed object. With a view of making this relation between the latter and the ransomer more expressive, it is often stated in the description of the ransomed object how it passed from the ransomer or his family into the possession of the present seller by means of the apposition of kú-ta-sham² ki-X-ta Y-ac kú-shú in-sham-a, "purchase by money, which from X, Y has bought for money," 64:4-6 (cf. R, 50b; 7-9, shi-ma-at X sha itti Y i-sha-mu), or shortened: kú-ta-sham-a ki-X,3 "purchase by money from X," 45: 4-7.1 The character of the redemption as purchase is made still more evident from the scheme employed at Tell Sifr, which is exactly that of the deeds of purchase, apart from the addition of the phrase \acute{e} ad-da-a-ni in-dŭ which occurs after the payment of the purchase price. The scheme of Sippar documents seems to have been the same as in Nippur, apart from the known grammatical differences.

Nippur.

⁴ The line is written over an erasure. The translation seems to be: One has given him a title deed to the pashishnoffice for all times on account of a (future) complainant.

⁷ Thus also H 13, 20a, b (ana ittisha) and Reisner, Telloh, 19; 3, Tell Sifr contracts have sham-ku (- shimatu).

³ When a substantive is connected with another in the sense which in verbal expressions is designated by ki-ta the Sumerian does not seem to have employed ki-ta, but only ki; cf. shu-ti-a ^dDa-mu-i-din-man ki ^dEn-lil-mu-lik, 51; 11, 12), but ki-Y-ta shu-ba-an-ti.

Cf. R., 50b: 7-9, shi-ma-at X sha itti Y i-sha-mu.

What the exact provisions of the law were with regard to the ransoming is still unknown. It is not likely that the ransomer possessed the right to compel the owner to sell his property to him at any time. From the analogy which the $g\hat{\alpha}\hat{c}\hat{c}$ in the book of Ruth presents, we may conclude that his privilege became valid only as soon as the property changed owners. The oath not to make a claim in future to the property sold $(g\hat{u}\text{-}nu\text{-}um\text{-}m\hat{a}\text{-}m\hat{a}\text{-}a)$ most probably, therefore, does not imply the renunciation to the right of redemption, but effectuates only the loss of the right to undo the contract as long as the purchaser and his family shall own the bought property themselves.

1). a. ŭ-kûr-shû lù-lù-ù gù-nu-um-mà-mà-a b. mu luqal-bi in-pû(d)

After Damiq-ilishu and Narubtum, his wife, had given 10 gin of a built house, adjoining the house of Imgua, for exchange to Nabi-Shamash, Nabi-Shamash, son of Imgua, has given 10 gin of a built house (and) courtyard for exchange to Damiq-ilishu and Narubtum, his wife. (But) because they have received the courtyard, Nabi-Shamash has paid 1 shekel of silver to Damiq-ilishu and Narubtum, his wife. In future shall one against the other make no claim; by the name of the king he (— each one) has sworn.

The general plan of the documents of exchange differs considerably from that of the purchase and redemption documents, inasmuch as the exchange is not conceived as a twofold purchase, but as a mutual sale. Notice the authentication of the exchange in No. 39 by a repeated *in-na-an-sò*, "the has given," the technical term for "to sell." There were two schemes in use at Nippur, one which keeps the two parallel actions of the exchange separate, and another which conceives both as one dihedral act.

Compare the schemes of documents from Tell Sifr and Sippar:

Tell Sifr (M. 46). A. a. First obj. of exchange. sham-kû Y sha itti ishâniu b. bu-ha-ti-shu second obj. of exch. sham-kú Z sha itti ishâmu c. i-na mi-it-aur-ti-shu-nu é-é-dím Y a-na Z in-aar (1. ň-kúr-shú, etc.

Sippur.

- A. a. A-na bu-nh (itti) first obj. of exch. cuil Y
 - b. Second obj. of exchange. cail Z
 - c, u-bi-ih-hu (a-na Z u-bi-ih-hu)
- B. a-na wa-tar-ti bît Y shiqlu kaspu Z α-μα Υ
- ŭ-kûr-shû, etc.

Since the two objects of exchange seldom represent the same value, this class of documents usually adds the statement, that the party which gave the less valuable object paid an additional sum of money (or real estate, etc.). The technical term for "to pay" in such instances is not in-na-an-lá(l), but in-na-an-bár. The same use of the term occurs in division documents.2

The oath is a mutual one, since both parties waive their rights. In the formula $l\dot{u}$ - $l\dot{u}$ - \dot{u} -ra $g\dot{u}$ -nu-um- $m\dot{a}$ - $m\dot{a}$ -a, the scriptio plena $\dot{u}(r)$ may be cited as a (not always occurring) characteristic of Nippuc tablets. No. 59 has the formula lù-lù-ra nu-gí-gí-dé, "they shall not turn against one another."

¹ Literally "to loosen, solve," pushāru; the corresponding noun is nam-būr-ru.

² Mu—shi, mu—sh, which introduces this part of the scheme, corresponds entirely to ashshim = ana shim, which probably has been formed under the influence of the Sumerian. The enclosed sentence is changed into a nominal expression by adding a.

Col. I: 4 acre 36 sar of field, lengthwise adjoining Elah; 5½ sar of garden of the field , one side of the garden adjoining the sons of Lu ; of the victual prebend (consisting of) the "great food," the half, and of the corn and dates of the of Mah, the half: the choice portion from the offices of the $kah\hat{u}$ and of the pashishu of the temple of Ninsun; 2 shekels of silver from the purchase price for Warad-NiuSHAH; 1 zag-gula bowl: the pivilege of the elder brother.

Col. II, 21 III, 25: 5½ gan of "great reed" field as equivalent to the built house, lengthwise adjoining Etali, his uncle; 6 acres of ibbatanum field, lengthwise adjoining Sin-idianam, the priest; 3 acres of lower highland, on one side adjoining Nanuar-ara-mungin. $4\frac{1}{2}$ acres 11 sar of the of Gilganicsh, lengthwise adjoining Ellil-lushay, his brother; the office of the pashishu of the temple of Ninsun as equivalent for the $us\hat{u}$ field; $12\frac{1}{2}$ sar of garden in the field, the side of the garden adjoining Nanuar-ara-mungin, his brother; of the half of the victual prebend (consisting of) the "great food" the fourth part; of the half of the corn and dates of of Mah, the fourth part; of the food of the $kal\hat{u}$ office, the compensation of their father, the fourth part; Ishtar-nahvari, the female slave, her value in money 11 shekels; therein (comprised) 5½ shekels of silver, the half, which Ur-Duazagga from his inheritance has paid to Ur-DUN-PA-ca; 1 miriza door, its money value 1\frac{1}{2} shekel, 1 "head" bowl, its money value \frac{1}{2} shekel; a fourth (of a shekel) of silver which on account of the ring Ellil-lushay has paid him, 1 si-na door, 1 beam(?) , of the house furniture the fourth part: the inheritance portion of Ur-Duazaqqa

The scheme of the partition documents is shown by No. 36 in a very precise form:

- A. Enumeration of the inheritance: ha-la-ba X
- B. Enumeration of the inheritance: ha-la-ba Y
- C. ibila-Z-ge-ne she-ga-ne-ne-ta in-ba-e-esh
- D. $(\check{u}-k\acute{u}r-sh\acute{u}\ l\grave{u}-l\grave{u}-\check{u}-ra\ nu-g\acute{i}-g\acute{i}-d\acute{e})\ mu\ lugal-bi\ in-p\acute{a}(d)-d\acute{e}-esh$

The parts A., B. represent the grammatical object to the verb in-ba(-(c)-csh at the end of c; ibila-Z-gc-ne refers as apposition to the persons who are named at the

⁴ The *u* indicates that the apposition in li. 13 refers to li. 10, as well as to li. 11 and 12.

² Cf. kū-babbar igi-te-bi, 14:7.

end of their respective inheritance. The oath, the contents of which is not stated expressly in No. 44, is a mutual one: $l\ddot{u}-l\ddot{u}-\ddot{u}-ra$ nu-gi-gi-di. The scriptor plana $l\ddot{u}-l\ddot{u}-\ddot{u}(r)-ra$ is a (not always occurring) characteristic feature of the Nippur tablets, while those from Sippur have $l\ddot{u}-l\ddot{u}-ra$. With the exception of No. 32, no use is made of the formula $g\ddot{u}-m\ddot{a}-m\ddot{a}$, "to make a claim to some object," since the purpose of the document is primarily to fix the mode of dividing, which shall not be altered again (gi-gi, "to turn, to upset, to undo"). Cf. later.

A special feature of the partition documents is the use of a separating line which marks off the portions of the different heirs, and thus makes the document more perspicuous. On No. 44 the line, for which there was no room left on the reverse, is even placed on the uninscribed lower edge. This shows that the line was considered to form a part of the scheme. Usually it seems to have been placed below the line of writing which begins with ha-la-ha, but on Nos. 1, 23 and 32 it is above the line, from which on Nos. 1 and 23 it is moreover separated by a small blank space. On No. 32 it is written only after the last portion; while on No. 43 it is in that place omitted.

Of special interest is the document No. 43, because it partly records the mode of a division already effected (the enumerated heterogeneous portions of the two heirs, nephew and uncle, are to balance each other), and partly fixes the mode of the future division of the rest of the inheritance (consisting of house, field and garden, which shall be divided into equal parts): ni-ba-c-nc, "they shall divide." But it seems that all partition documents more or less were of a similar preliminary character. Apparently their aim was in the first place to furnish the legal forms which authorized the heirs to dispose of their inheritance without being thwarted by the rights of the co-heirs, while a definitive settlement was left to later agreements between the different parties. For this fact an instructive example is found in the group of centracts Nos. 32-35. No. 32, dated Tashritu 17th, records the division of a house among four brothers, but in Nos. 33-35, dated Arah-sanna 9th and 21st and Kislimu 5th respectively, the eldest brother buys back all the shares of the house that had fallen to his co-heirs.2 This accounts also for the fact that in division documents we find the houses quite mechanically dissected into as many pieces of equal size as, it seems, was desirable. Thus in No. 44 a new house and an old one are both divided into

⁴ Cf. the similar provision in adoption documents. Ni-ha-e, plur. ni-ha-e-ne, is the luture to in-ha, pl. in-ha-esh. Cf. ni-lâ(l)-e, ni-lâ(l)-e-ne, 56: 16, and in-hâ(l); ni-àg-e (in Nippur texts enly al-àg-e, 15: 11, 17: 8, 50: 10, C3: 9) and in-ág: ni-dū-e, "he shalf build," 11: 13, and in-dū.

² Compare the similar case in M. 19 where two brothers exchange parts of their inheritance.

halves. In No. 32 one house is first divided into two halves, and then one of these halves again into four parts of equal size.

Attention may be called to the part which the eldest brother plays in the partition documents. He has an equal share with his brothers, but receives in addition a preference portion which in the document always heads the enumeration of his inheritance. In No. 26 it is even separated from the portion due him as a son, by means of a line. The technical term is sib-ta mu-nam-shesh-gal-la-shû, "preference title on account of the position as eldest brother." For the Semitic equivalent (zittn) elatu see H R, 9, 76, and Meissner in A, P, R, p. 2.

The proportional amount of the preference portion cannot be exactly determined because of the broken condition of the tablets in question; but from No. 32, provided we are allowed to generalize because of this instance, it would seem that it amounted to one-half of the inheritance; the number in li. I is probably to be restored as $1\frac{1}{3}$, equal to 1 times $\frac{1}{3}$, i.e., the sum of the regular portions of all heirs. The same mode of dividing we find in 26, 1, 10–13 (shu-ri-a-bi), compared with 26, 1, 29–31; 11, 10–12; III, 12–13 (shu-ri-a-igi-f-gi-bi), but our right to quote this instance may be questioned because the item given there figures as the sib-ta from another item; the amount of the other items of the sib-ta in this document, as far as they are preserved, differs considerably and is much less than the regular portions. Though it is thus impossible to arrive at a definite result in this question, this much seems to be certain, that the amount of the sib-ta was in some way or other a fixed one, because in adoption documents where two persons are adopted as brothers, it is provided that they shall divide the inheritance into equal parts after the eldest brother has taken his preference portion; no information being given as to the amount of the latter.

While the *sib-ta* generally was rated from the various items of the inheritance,² one object seems to have formed an integral part of the *sib-ta*, viz., the *gishbanshur zag-gu-la*, written also *zag-gù-là*, in Akkadian *pashshur sakki*. This kind of bowl (plate or kind of table?) occurs in the preference portion of the eldest brother in all documents except No. I, its place being always at the end (26, 1, 15; 32: 3, 43: 3). Notice furthermore that in no document its money value is noted, while this is done 26, 111, 20, with a *grishbanshur sag-DU* given to a younger brother.

⁴ Nevertheless this custom would not have arisen unless it had been founded on actual conditions, and we must, therefore, conclude that the Babylonian houses, which as far as we can judge from the present remains consisted of walls of sun-dried bricks, over which the beams of the roof were spread, could easily be divided into several parts by building boundary walls across them. That this procedure was actually practiced we may infer from the fact that several times mention is made of boundary walls in the common possession of two neighbors.

⁷This is expressly stated in adoption documents, where it shall be taken from house, field and all household furniture; cf. also sib-ta nam-gala ic nam-shatag e^d[Nin-sun], 26 · 13.

Apart from the privilege of the eldest brother, the principle was followed that brothers divided the remainder into equal parts: nr-a- \hat{si} -ga-bi in-ba-csh (ni-ba-csh); ur-a-sh \hat{u} \hat{si} -ga-bi in-ba-csh, 23 : 23, 43 : 34, 46 : 10.

The following scheme of partition documents from Tell Sifr (8, 25 and 26, 52, 91) corresponds in its construction on the whole to that used in Nippur:

- A. a. Enumeration of the inheritance: ha-la + X
 - b. Enumeration of the inheritance; ha- $la \rightarrow Y$
 - v. (dumn-mc-csh Z, S, 52, 21) i-na mi-it-gn-ur-ti-shu-nu iz-ga-am i-du-n-ma ha-la é ad-da-a-ni ni-ba-c-ne
- B. ŭ-kúr-shú, etc.

Here the future actual division is distinguished from the legal fixing of the respective shares. "In mutual agreement they allotted the shares and shall (later on) divide the inheritance of the house of the fathers."

V. Adoption Documents (4, 24, 28, 57).

Gibil-bi-sha-a-on, 10:20 gibil-bi-esh-a-an, is composed of gibil-bi-shi (= ana eshshitishu = "aufs neue") and the iterative element a-an = ām. The simple "anslaut" sh(n) as well as the compound "auslaut" shuan—sham passed over into the Semitic Babylonian, the former as the common adverbial ending ish, ash, the latter as the iterative ending sham(ma) in esh-shi-sha-am-ma, "again, anew," R. 6:13; in āmisham, "daily" and shattisham, "yearly," Compare also har-shu-a-an, "on account of all this," Samsu-iluma, 21.

^{*}Shurau-bi-shû is an adverbial expression formed like gibil-bi-shû with the postposition shû. The Sumerian construction can be rendered more closely in German; "Das Hausgeraut zur Haelfte," The determinative element bû in such adverbial formations is rendered in the Semitic Babylonian by means of the possessive pronoun, e.g., and sihirtishu (to which compare in Hebrew lebaddô)

² Cf. á-mu-u-n, 29 : 10.

Office value to for SHAR (from the Semitic tibu) ensues from the often occurring ba-al-pa-at = perm, fem. sing. Cf. No. 70: 157 C. T., VI, 26a: 11, 30 - 207 VIII 20 c, y., etc.

Awirtum, the daughter of <u>Hupatum</u>, from <u>Hupatum</u>, her father, and <u>Rubatum</u>, her mother, <u>Shalurtum</u>, wife of I(nim)-Nannar, has adopted as her daughter. 1_3^2 shekels of silver as money (compensation) for her adoption <u>Shalurtum</u> has paid to <u>Hupatum</u>. <u>Awirtum</u> shall be made a votary and then she shall let <u>Shalurtum</u>, her mother, eat her prebend. When <u>Awirtum</u> says to <u>Shalurtum</u>, her mother: "My mother not art thou," she shall be sold for money. But when <u>Shalurtum</u> says to <u>Awirtum</u>, her daughter: "My daughter not art thou," she shall pay 10 shekels of silver and shall forfeit the money for her adoption. By the name of the king she has sworn.

The scheme of adoption documents consists of (1) the adoption proper; (2) the regulation of the position of the adopted with regard to the property; (3) provisions concerning the solution of the adoption contract; (4) oath.

A. The technical term for "to adopt" is nam-dumu-ni-shû (No. 57), nam-ibilani-shû (No. 28) or nam-dumu-sal-a-ni-shû (No. 4) ba-da-an-ri or ba-au-da-ri. No. 24 distinguishes expressly between nam-dumu-ni-shû ba-da-an-ri and nam-ibila-ani-shû in-gar, and it is evident that a difference "in re" corresponds to this distinc-

³ To the combination of gar and kn compare the compound gar-kn-a (Reisner, Telloh, 101, IV, 7) and Br. 11997 and 11951.

⁷ The formation bali-dam is not determined as to the genus rerbi; it usually designates a future action; dam is to be analyzed as de-a-an.

tion of terms, the first kind of adoption giving the person concerned only the right to be brought up and kept like a child (dumn, mårn) in the house, the latter conferring also the right of inheriting; ibila, abla therefore has the meaning of "heir." In No. 28 we find the contracted formula nam-ibila-ni-shå ba-an-da-ri.

Instead of the usual formula: $X = Y^2 - nam \cdot dumn \cdot m \cdot shin$, etc., $ba \cdot da \cdot an \cdot rr$, No. 4, exhibits a scheme closely corresponding to a deed of purchase:

a. X (= object of adoption) ki-Y ad-da-ni-(etc.)-ta Z-\(\mu\) namdumu-val-a-ni-s\(\hat{n}\) ba-da-an-ri

b. x gin kú-babbar kú-nam-chi-a-ni-shús Z-ge Y-ru in-na-an-lú(t)

This is explained by the different legal position held by the adopted, who as a girl, and probably still a child, does not possess the right of disposing of herself, and therefore is rated rather like a useful help, for whose cession an indemnification must be paid: technical term $k\hat{u}$ -nam- $c\hat{h}\hat{\iota}$, ''money (indemnification) for the bringing up."

- B. The regulation of the rights of the adopted to the property was subject to agreement, but in most cases the general rule concerning the right of inheritance seems to have been applied also to the adopted, *i.e.*, it was provided that the brothers divide the inheritance into equal parts after the eldest had received a preference portion. Therefore in our documents the adopted, when more than one, and provided there was not already a natural heir, are introduced at once as X shesh-gal and Y shesh-a-ni. This formula seems to be peculiar to Nippur contracts, for in Sippar we find the express statement that of more than one adopted, one shall be the alm resp. mâru rabû. Cf. M., 94:13. No. 4 contains at this place a provision as to the employment of the adopted girl, and the use to be made of her income. See for a similar provision made in Cassite times, Clay, B. E., Seties A, XIV, 40:6-8: shum-n.a a-na mu-tim i-nam-din-shi_shum-ma ha-ri-mu-ta ib-hu-us-si a-mal-sa u-ul i-sha-ak-ka-an, "be it that she gives her to a husband, be it that she makes her a votary, her slave she shall not make her."
- C. The provisions as to the solution of the adoption contract show the casuistic form of the laws in the *Code of Hammurabi*, known in Sumerian also from the so-called Sumerian family laws. The various directions of these latter reoccur in our documents, although with considerable grammatical and often material variations.

¹ Cf. Ungnad, O. L. Z., IX, col. 462–465.

² The gc denoting the grammatical subject is found in No. 4, but not in the other adoption documents, which moreover are very careless in the distinction of plural and singular endings, infixes and suffixes.

³ The following and the preceding lines differ from that of the corresponding lines in purchase deeds.

 $^{^4}$ $E\underline{h}i = liq\hat{u}tu$, harbitu, coner. the child which is brought up; ham- $c\underline{h}i = liq\hat{u}tu$, harbitu, abstr. the adoption, the bringing up of a child.

They were evidently put together either for accomplished scribes or for those who were learning to write, to serve as patterns for the corresponding parts in adoption documents (law 1-4), marriage contracts (law 5 and 6) and contracts of hiring (law 5). This is very evident from the line which heads the collection of laws: \ddot{u} - $k\dot{u}$ -na-mc- $sh\dot{u}$, "in future, always," which is not quite suitable for a collection of laws, since laws are given in the first place for the present (Hammurah begins his code of law with i-nu-mi-shu, "now," C, H., 5:25), not for the future.

D. The oath which is omitted in No. 57 is a mutual one (*she-ga-ne-ne-ta*) when the adopting and the adopted are the negotiating parties (Nos. 24, 28); in No. 4 it is taken only by the adopting priestess who concludes the contract with the parents of the adopted.

The great number of adoptions and the fact that adults, and often more than one, are adopted show that in Babylonia adoption formed a kind of business transaction by which not only the adopted, but also the adopting person gained an advantage. This consisted primarily in the help which he had from the adopted, and which he needed especially at his age when he could no longer earn his sustenance himself. This becomes very evident from No. 28, which determines the exact amount of the sustenance which the adopted, and the legitimate son have to give to their father, and from No. 4 where the adopting priestess secures for herself the benefit of her a lopted daughter's sustenance.

The document No. 57 combines adoption, division of an inheritance, and obligation to pay annuities. Such combinations are a characteristic feature of Nippur documents, while in or near Sippar, as we have seen already in connection with the division contracts, separate documents for each party were drawn up, in which only the individual rights that a person had secured were set forth. As an example of such an in-lependent document of the character last mentioned, see C. T., VIII, 37a: 1. shc-guv-ba 2. 3 qa iá-gish-ba 3. igi-4-gál kù-babbar sìg-ba 4. i-na mu-1-kam 5. a-di A-bi-ra-tum 6. ba-al-ta-at 7. 3 isin $\frac{1}{30}$ zid-da 1 uzu(?) 8. Awilia, son of Warad-Sin, has taken Naramtum, daughter of Sinatum, to wife. Ibi-Enlil, the heir (and) elder brother, Hushu-ibnishu, his brother, and Hima-abi, their brother, Awilia has given to Naramtum, his wife, as sons. Ibi-Enlil, the heir (and) elder brother, Hushu-ibnishu, his brother, and Hima-abi, their brother, shall divide house, field, garden, maid-slave, man-slave and the property that exists in the house of Awilia, their father, into equal parts after the eldest brother shall have taken his

⁹ This document uses qc only here (but not, eq., in h. 1, 13, 15, etc.) to denote the subject, while else it designates with qc the generity (h. 10, 20, 24, 32).

The scheme of the marriage contracts corresponds in its four parts—(1) the marriage proper (treating of the persons); (2) the dowry (treating of the property); (3) the break of the contract; (4) oath—as well as by the formulating of the single parts, entirely to that of the adoption documents, both kinds of treaties being also "in re" closely related to each other, as they both belong to the family law.

- A. The technical term for ''to marry," nam-dam-shú in-tug (48:3), ''he has taken into wifehood," nam-dam-shú ba-an-tug, ''he has taken for himself,'' $^{\iota}$ etc., shows the same formation as nam-dumu-shú ba-da-an-ri.
- B. The technical term for "to bring as a dowry" is in-na-ni-in-tur, "she has brought in," the same as in German, "einbringen;" in Sippar documents, the more explicit term, ana bit X (R., 101:18, husband; R., 84:39, father of the husband), <math>usherib, is used.
 - C. Cf. the adoption documents.
 - D. The oath is a mutual one $(she-ga-ne-ne-ta\ mu\ lugal(-ur-)bi\ in-p\acute{a}(d)-d\acute{e}-esh)$.

No. 48 is a combination of marriage contract, adoption document and obligation to pay annuities, inasmuch as the wife is given by her husband also the legal rights of a mother over the sons of his former marriage by making them her children (dam-a-ni-ra nam-ibila-ni-shú in-na-an-sì). The principle followed in this

¹ Cf. Z. A., XXI, p. 220.

² On the infix ni, "therein, thereinto," cf. Z. J., XXI, pp, 232-236.

³ Subject the father of the bride; R. 101:19, u-she-ri-bu-shi (object = the bride).

 $^{^4}ur = mitharish$, ishtenish, Br., 11259, 11261, is as adjective connected with mu-lugal (object), not with the predicate.

combination is the juxtaposition of corresponding parts (A. 1, and 2, 1, C. 1 and 2). The mother acquires the right to be sustained by her sons after they have inherited the property of their father. The amount of the sustenance is fixed (D).

Dushubtum, the priestess(?) of Shuzi-anna, the daughter of Duggâ, has manumitted Ishtar-rabiat, her maid-slave; her forehead she has cleansed; the of her slavedom she has pronounced; a document on her cleansing she has given her. Ishtar-rabiat has brought in to Dushubtum, her mistress, ten shekels of silver. In future shall Ibi-Entil and Amertum, his sister, the heirs of Nanna(r)-zima and Dushubtum, make no claim against Ishtar-rabiat. By the name of the king they both have sworn.²

⁴ The scribe intended perhaps mu-ne im,

² This document from Yokha shows several peculiarities. Notice the habit of leaving a blank space between wedge and name (fi. 4, 9, 40 and 47) and between igi and name (fi. 21/34); DAM(?)-DINGIR(?) instead of SAL + ISHIB; the mentioning of Shazimma and the absence of the bar-gal.

The scheme consists of four parts: 1. The freeing. 2. The paying of a compensation in money. 3. Provision as to future claims. 4. Oath.

- A. The technical term for to ''set free'' is ama-ar-gi-ni in-gar = andurarshu ishkun, ''he has made his liberty.'' As formalities connected with this act are enumerated the following:
- 1. A religious ceremony, the cleansing of the forehead: *sag-ki-mim-láh-láh, Sem. bu-zu u-li-il, C. T., IV, 42a; only ullil, R., 96:7; C. T., II, 33:4; VIII, 29a:6; 29b:3; 48:5. The cleansing, which in all these cases appears as correlative to an adoption of slaves, in the Yokha document, however, to a manumission, refers to religious cleanliness, as is also shown by the phrase u-nu *Shamash u-li-il-shi-na-li, C. T., VIII, 29a:6. This is a very important fact, because therefrom it would follow that slaves were not allowed to participate in the cult of free Babylonians. In VR. 47: 32b the same ceremony is described as a removing the muttûtu, i.e., the slave mark which was placed on the forehead (muttatu), and as a removing the abuttum.
- 2. Whether the pronouncing of the dissolution of servitude represents a legal formality or a further religious act, perhaps the reciting of an exorcism, is difficult to say.
- 3. The legal formality of giving a document which authenticates the cleanliness. The term kishib-tág corresponds to, or, more correctly, was the model for the Semitic kishippam or kunukkam czebu, literally "to leave one's seal impression" (in the possession of the other party).
- B. The 10 shekels of silver, the equivalent paid for the manumission, represent about the value of a maid-slave, who, e.g., in 20, HI, 15, 16, is estimated at 11 shekels. In the other cases of ''cleansing'' the equivalent consists in the obligation to care for the adoptive parents. The term in-na-ni-in-tur, ''she has brought in,'' is the same as that used in connection with the bringing of a dowry; here most probably ''the bringing in'' is meant in the commercial sense of yielding proceeds, returns, from which we may conclude that the maid-slave had to earn money for her mistress in such a way that part of the proceeds were credited to her.
- C and D. Like in similar documents, the provisions against future claims are directed against the heirs of the former mistress. In this instance also the oath has been taken by them $(mu\ lugal-ur-bi\ in-p\acute{a}(d)-d\acute{e}-csh)$.

¹ Ranke's view (B. E., Series A, VIa, p. 29) that bu-zn refers to the pudenda is confuted by the Sumerian sug-ki = pûtu, pânu. Lâḥ-lâḥ-ga, Br., 7927 = ellu.

² So expressly stated R., 96, sha X u-da-am-mi-ku-shi-ma a-na ma-ru-ti-sha ish-ku-nu-shi.

³ Kunukkam ezibu (C, H.) shows that we have to read kiship-pa-am, not dup-pa-am ush-te-zi-ib, C, H., 9a: 34.

⁴ Ur does not refer to mistress and maid-slave, since the latter enters into no obligation, in which case we would also expect she-ga-ne-ne-ta. Moreover the parts C (no claim shall be made against the former slave) and D belong, like in purchase documents, closely together, and thus ur refers to the two children of the mistress.

VIII. DEEDS OF LOAN.

No. 22.

B. ma-DU ebur-ka kara-Nibru^ki-ka she-al-ág-c

$Xo^{-2}I$

Loan of bricks.

A. $\frac{1}{2}$ sar 1 gèn sig sig Na-bi-dShamash ki Na-bi-dShamash \forall Igi-dNanna(r)-shù-al-gin shu-ba-au-ti

B. itu sig-a sag sig ki-gar-ra-bi-shii gur-ru-dam

½ sar 1 gin of bricks, the bricks of Nabi-Shamash, from Nabi-Shamash Iyi-Nannar-shu-algin has received. At the beginning of the month of Siwan he shall return bricks for exchange.

Deeds of loan, hire, rent and lease form a group of legal documents by themselves, inasmuch as they transfer a right to the concerned object of treaty only for a time. We therefore find in such documents neither provisions as to future claims nor the oath. Thus of the four parts of the deeds of purchase only the first two are left, which treat of the passing of the property into other hands and the equivalent given in exchange, here the payment of interest, rent, etc. Cf. the following schemes of deeds of loan and of hire:

	Loan (money or grain).		Hire.
A.	Object of the loan.	Λ .	\forall X (object of hire).
	ki-Y-ta		ki-Y-ta
	\forall Z - ge		₹ Z-ge
	shu-ba-an-ti		in- KU

⁴ Bricks were measured, as we see from M. 82 and this instance, by superficial measures. This seems to presuppose that they had a fixed diameter.

B. mu-DU (nd-)cbur-ka
 B. ά-bi id-da-shú
 C (ù másh)-bi
 x she-ta-a-an
 al-ág-e

A. The technical term for 'to take as a loan' is shu-ba-au-ti, 'the has taken, received.' pl. shu-ba-au-ti-csh (Sippar: shu-ba-au-ti-mc-csh). The object, when grain or money, is always accompanied by an apposition denoting whether the loan shall bear interest $-m\acute{a}sh-in-tng$ (au-tng) - or not - $m\acute{a}sh$ nu-nb-tng—; that is to say, whether the interest has still to be added to the amount noted in the document, or whether it is already included in it, respectively has been paid already. Instead of $m\acute{a}sh-in-tng$ we find in Sippar documents $m\acute{a}sh$ dah-hc(i)-dam, e.g., $m\acute{a}sh$ 1 gur $\frac{1}{5}$ + $e^{-1}_{3,0}$ dah-hc-dam, 'as interest from 1 gur he shall add 100 qa,'' R., 38: 2; in Semitic, e.g., sibat "Shamash u-za-ap, "the interest of Shamash he shall add," R., 27: 2. Contrary to the documents from Sippar, those from Nippur do not indicate the rate of interest. Probably there has been in use at Nippur only one rate which was understood in all cases. Only No. 16 indicates the amount of interest for grain, because it shall be paid in money.

B. Since the compensation for the loan has been determined before by the statement concerning interest, this part contains only provisions as to the time and the place of returning loan and interest. The verbs used to denote the returning are gur-ru-dam, "he shall return"; al-ág-c (Sippar: ni-ág-c), "he shall measure" of grain; and shag-ga-ni nc-ib-dug-gi-cn, 20:8, plur.: nc-ib-dug-gi-csh, 16:10, "he shall satisfy his heart."

The usual time for the return of grain and money is at harvest. For bricks, in No. 21, the month of brick-making, $Siw\hat{a}n$, is designated. Instead of $ud\text{-}cbur\text{-}sh\hat{u}$, which occurs on the Sippar tablets, our tablets show mu-DU (ud-)cbur-ka. As ka denotes the ablative of a genetive combination (cf. $kara\text{-}Nibru^{ki}\text{-}ka$, "in the granary of Nippur," 15:6), mu-DU should be connected with cbur or ud-cbur. But it is difficult to determine the precise meaning." Only in the one instance just quoted (15:6) we find a statement concerning the place of the payment. A statement as to a certain grain measure, corresponding to i-na $gish\text{-}shi^3$ dShamash on Sippar documents, is not found.

[!] Shag-(qa-ni) ne-ib-dag-qi, 27 - 7, 14 - 9.

² Perhaps "in the present (current) year." Compare for the connection of mu and du, mu-2-kam-du-u-bi, 42:7.

³ For GISH-BAR we find 80 - 10 qish shi, as BAR interchanges with shi in nodü-shi-u (ci, e.g., the date Ad 13), where the reading shi is proved by the Semitized form dushû, it follows that gish-BAR is to be read gish-shi.

IX. Contracts of Hire (51).

No. 51.

A. \(\gamma \) I-din-Ishtar \\ dumu \ N\a-bi-'\Shamash \\ ki \ Na-bi-'\Shamash-ta \\ \gamma \) L\u-'\Shamash-ta \\ i\ \\ L\u-'\Shamash-ta \\ itu \sigma \u-21-ta \\ itu \shc-g\u-kud \u-30-sh\u-in-KU

B. \acute{a} -bi `id-da-sh \acute{a} $\frac{1}{5}$ + $\frac{2}{30}$ she-ta-a-an al- \acute{a} g-e

Idin-Ishtar, the son of Nabi-Shamash, from Nabi-Shamash Lu-Nin-si-anna has hired (for the time) from Siwan 21st to Adar 30th. As his hire he shall pay 80 qa of grain every month.

- A. The technical term is in-KU, igar, "he has hired." The duration of the hiring is indicated by $-ta = -sh\dot{u}$.
- B. Cf. the deeds of loan. The wages (technical term $d^4 = idn$), which in this instance do not represent a great amount, are probably paid at the end of the time of hiring, since a specified term is not mentioned.

X. Leases (Nos. 29 and 61). No. 29.

Lease of a field.

4 gan á-shag gúg-she
shag a-shag dNin-unu
us-a-rá A-gu-u-a
a-shag Ib-ga-tum
dumu Ur-Dù-azag-ga
ki Ib-ga-tum dumu Ur-Dù-azag-ga-ta
\(\frac{d}{Da-mu-i-din-uam-ge} \)
uam-urú-tá-shú
igi-3-gál-shú
[á]-mu-u-a-shú
[íb-]ta-an-è

 $^{^{1}}$ Cf. also á-mu- \hat{u} -a and á-mu-u-a, 28 : 20, 22; 29 : 10.

4 gan of gig-she field in the field of Nin-unu with one long-side adjoining Agua, the field of Ibgatum, son of Ur-Duazagga, from Ibgatum, son of Ur-Duazagga, Damuidinnam has rented for the purpose of cultivating, at the rate of one-third (of the returns) as yearly rent.

The documents of lease from Sippar (and other cities) show, like the deeds of loan and hire, the characteristic two parts. Cf. c.g., R. 74 (Sippar Am-na-num):

- A. $\frac{1}{3}$ bur 3 gan eqlum ugar na-bil(?)-tum—itti Be-li-tum SAL(+ISIIIB) ^dShamash mårat. Hu-shu-ib-ni-shu—be-el-ti—eqlim— $\overline{\gamma}$ Ib-ni-^dShamash—mår. Hu-na-ṣi-ir—eqlam a-na ir-ri-shu-tim a-na biltim—u-she-zi.
- B. ud-ebur-shû = 4 she-gur gish-shî dShamash = i-na Kar-Sippar k_0 Am-na-na ni-âg-c. .

Or P. 77:

- A. I bur \(\frac{1}{2} \) bur \(\frac{1}{2} \) bur \(\frac{1}{2} \) gan \(a\)-shag \(a\)-shag \(A\)-bi-ia-tum \(\text{lagal } a\)-shag-ge \(\) \(\text{\chi} \) Warad-\(d\)-Mar-tu \(n\) am-ur\(u\)-l\(d\)-sh\(u\) \(i\)-ta-\(d\)-a.\(\text{\chi} \)
 - B. ki-ma i-mi-it-ti-shu h shu-mi-li-shu she ni-ág-e.

The only completely preserved deed of lease from Nippur, however, unites the two parts into one.

The technical term for "to take in lease, to rent," is ib-ta-an-i, "he has brought out." The addition nam- $ur\hat{u}$ - $l\hat{u}$ - $sh\hat{u} \approx ana$ irrishutim is not superfluous, because the lessor, even if the rent was not dependent upon the returns, had a great interest in his land being properly cultivated, in order to keep it from waste.

XI. Acquittance.

No. 65.

Receipt for the purchase money of a house,

A. 3 gin kú-babbar
sham-ć(? kisal)
Y Ki-ish-ti-^dNin-IB
dumu T ab-ba-la-du
ki Ba-li-lum

dumu Zi-ia-tum
shu-ba-an-ti

shng-ga-na ba-ab-dug-ai-en

I Ib-la-c-a ib-la-o a?

В.

^{*} Like right and left he shall pay, i.e., the harvest shall be divided between lessor and lessee into equal parts,

3 shekels of silver, the purchase money of a house, *Kishti-Nin-IB*, son of *Tab-balatu*, has received from *Balilum* and *Sin-malik*. His heart shall be satisfied.

The technical term of these receipts is shu-ba-an-ti — mahir, "he has received." The phrase shay-ga-na ba-ab-duy-gi-cn is, it seems, the passive equivalent to uc-ib-duy-gi-cn and, like this and shu-ba-ab-te-gá-cn, future, although one should more expect a perfect, "it has been satisfied."

XII. MEMORANDUM OF GRAIN.

No. 55.

 $\begin{bmatrix} \frac{1}{5} & + \frac{1}{36} & she & shu-]ti-a & Ba-ba-a \\ \frac{3}{36} & she & shu-ti-a \\ & lin^{-su}nsán-sur \\ \frac{1}{5} & + \frac{4}{36} & she & sham & su-c-sir-zun \\ \frac{1}{5} & she & ki-dish(?) \\ \frac{1}{5} & + \frac{1}{36} & she & i-na & gish-ba-an \\ & lin-gash-tin-na \\ shn-ti-a \\ & Ut-ta-gàl-lu-ma-an-sì \\ & shu-kil & l & \frac{3}{36} & she-gur \\ & shu-ti-a & d Da-mu-i-din-nam \\ & ki & En-lil-ma-lik \\ \end{cases}$

 $\frac{7}{30}$ gur of grain which $Bab\hat{a}$ has received; $\frac{3}{30}$ gur of grain which the harness-maker has received; 100 qa of grain, the price for shoes; 60 qa of grain ditto(?); 1 gur 10 qa of grain in the of the wine-maker which Uttagallu-mansi has received; in all 1 gur 30 qa of grain which Damu-idimam has received from Enlit-malik.

Annotation: The verbal adjective shu-ti-a, "received," from shu—ti, stands instead of a relative clause, which we find, e.g., C. T., VI, 25:5:½ she shu at-ta te-el-ku-u, "which thou hast taken," li. 2, I she-gur shu ta-am-hu-ru, "which thou hast received." Shu-ti-a has passed into the Semitic Babylonian as shutů, gen. shu-ti-i, 130:11.

XIII. Confirmation Document.

No. 42.

A. a. \forall ^dSin-a-bu-shu dumu ^dNannar-lù-ti kishib-ash-ash nam-yala ii ha-la-ba-ni
\(\times^a Nannav-tum nu-csh-?\)
shu-na ba-an-si-ma

\(\times A-ba-"En-lil-dim\)
shu "Nannav-tum-ta
kishib-ash-ash "Sin-a-bu-shu
ba-an-tum
\(\tilde{u}-kin-shi) ain-ait-ta kishib-ash-ash-ash

B. ŭ-kûr-shû gù-gâl-la kishib-ash-ash TA-ba-dEn-lil-dîm ba-an-ni-gî-gî

Two years after the titles to the *kalū* office and the inheritance of *Sin-abushu*, son of *Nannar-luti*, have been conferred upon *Nannartum*, the priest, (now)after *Sin-abushu* has died, *Aba-Enlil-dim* has received the titles of *Sin-abushu* from the hand of *Naunartum*. In future a complainant on account of the titles, *Aba-Enlil-dim* shall satisfy.

The document authenticates to a person the receipt of titles to a temple office. It is not sealed by the person from whom the titles are received, but by the witnesses, i.e., a collegium of the chief kalû and the chief temple superintendent, besides a riqqu, a pashishu and a scribe. From this fact we may conclude that the temple, perhaps on account of the death of the former owner, had to dispose of the titles. It is not stated what the recipient had to give as an equivalent.

ANNO (ATION): Li. 8 presents an example for the substantivation of sentences, inasmuch as ^dSin-a-bu-shu ba-IDIM, "Sin-abushu died," is made dependent on egir—ta, literally "from after," i.e., "since,"—Exactly the same construction we find Urukagina, Clay (ablet, Rev. II, 11-12, the GISH-IJU-ite is guilty of guilt with Ningirsu, egir Lagush^{ki} ba-hul-a-ta, "since Lagush is destroyed."

XIV. AGREEMENTS CONNECTED WITH PROCEEDINGS BEFORE A COURT OF LAW.

I. No. 10.

Cession of a house.

Mar-irgitim, the elder brother, and Mutum-ilum, his brother, the sons of Ishkur-rabi, went before Hammurabi, the king and spoke as follows: "9 acres of cultivated land worth in money 10 shekels, the equivalent of the pashishu office of Ninlil and the prebend field, Ududu, the pashishu of Ninlil, the brother of our father, has sold to Ishkur-rabi, our father."

The king and *Ishkur-sharrum*, the soldier messenger of the king, the son of *Ishum-abi*, on their part wrote that the council of Nippur should render them justice. In the council of Nippur they considered the case and ordered to give one sar of built house as equivalent for the 9 acres of cultivated land.

Again one with the other has agreed. In mutual consent 4 sar of built house and waste ground, (and) additional 4 gin of waste ground on account of the house having still to be built with the front adjoining the house of Nin1B-rim-ili, on one side adjoining the house of Nin1B-qurrad, the baker, on the other side adjoining the house of Warazunu, the carpenter, Ishkur-RUSHra, the pushishu of Nintil, and Ibgatum, his brother, the sons of Ududu, have given to Mar-irgitim and Mutum-ilum, the sons of Ishkur-rabi, as equivalent for the pushishu office of Nintil. In future shall Ishkur-RUSHra, Ibgatum, his brother, and any heir of his make no claim to this house; by the name of the king they have sworn.

The document consists of three parts: (1) Record of the appeal to the king, li. 1–10; (2) Remittal of the case to the council of Nippur, and decision of the council, li. 11–19; (3) Acceptance and execution of the decision by the parties, li. 20–36. The principal interest of the document as such centres in the last part, the authentication of the assignment of real estate. The account of the previous history of this

cession is of less interest for the document. This expresses itself in the tenses of the verbs, only those of the last part being in the perfect (ba-lal, li. 21; e-lal, li. 33, 36), while those of the first two parts are in the historical tense (mu-lal, li. 13; ne-lal, li. 5, 10, 15, 19; i-ib-lal(?), li. 5).

Of direct appeals and complaints to the king we know a good many instances from the letters of *Hammurabi*, and one from S. 1 (to Nur-Ishkur). In the latter instance the king renders judgment himself, while here, as in the letters of *Hammurabi*, the king turns the case over to the home authorities. The pulyrum of Nippur is the city council. As a subaltern officer of this council appears the rêd pulyrum, who is mentioned, 53:37 (= 34:36), beside a rabiş daiiani. It is likely that this council represented the administrative and executive authority as well as the regular court of justice for Nippur, thus corresponding to the college of judges in Sippar, who, together with the shakanakku, are often called upon in the royal letters with regard to administrative matters. In smaller towns, like, c.g., Tell Sifr, a rabiānu, "mayor," exercised the executive functions of the government, while judgment was rendered in the neighboring city of Larsam.

ANNOTATIONS: dHa-am-mu-ra-bi lugal-e, li. 3.—It is unlikely that we should read dingir, etc., "God and Hommurabi," The "auslant" e these not denote the nominative, but is most probably due to the influence of the L. To gabi-ib-ri-esh, li. 5, cf. 8 , 1 : 10: lugal-r-gah-in-ne-ri-rsh; gab - ri-means "to be or stand face to face," - The meaning of igi-ne-ne-in-gar is not clear. Supposing that igi-gar is a compound verb (cf. igi-mu-na-ni-gar, Gud., Cyl. V, 1:20), upon them, which might be understood of a favorable acceptance at the court. But then the change of subject would present some difficulty. On the other hand a translation, "their face they (the complainants) have turned" (igi-me-m in-gar-ri-esh panishana ishkana), would require the indication of some object towards which they turned their faces. -ma after verbs stands in li. 5, 13 and 17, before direct speech or an order in the infinitive; but 1 do not venture to conclude from these instances that it is its function to introduce the speech (= umma; ma). Apparently it is the equivalent of the copulative ma, "and then," the surprising treatment as postposition of which and its difference from it might thus be easily explained by its Sumerian origin. Shesh ad-da-me-e, li. 8: the "auslant" e denotes the nominative; cf. ibila-U-du-du-ge-no-c, li. 30. In-si, li. 9, perfect tense, because they assert that it is now their property. Ne-inbi esh, li. 10 and 19, bi for bi, qibû, "to speak." Dur-bi ne-ne-in-dieg). li. 15, (dur dig-ga = qibû sha ameli, Br. 10574) contains the command of the king. We would expect that this should be indicated in mood or tense, but as far as we can judge $durbi\ neudu(g)$ is the historical preterit tense in the indicative mood, and we may therefore think of a mistake of the scribe, so much the more as after munsarresh-ma and the direct speech we would expect a verb like "to order": they wrote and ordered that, etc. Si-ma-ab ne-in-bi-esh, Ii. 19, for the construction of bi with infinitive, compare 19: 29: shibizunu gabām iqbāslannishi; Gud., Cyl. A. 1: 19: e-a-ni dū-ba mu-na-dūg; and Warad-Sin, Clay cone 2:5 (quoted below). Mu é-du-ù-dè, li. 21, the 4 gin of waste ground are added to the 1 sar mentioned in li. 23, because this I sar does not wholly consist of e-du-a, but partly also of kizlah, and therefore a part of the house must be built before it becomes t sar v-disa. Compare the similar case in 11:16-20. To e-dit-it-de compare e-a-ni du-n-de,

⁹ In the third duplicate, 52, 26, the rid pulgrum is designated only as ridü, from which we may conclude that with the ridü in 11–31, 28–12 and 58–22 likewise the rid pulgrum is meant. This shows that also in 11, 28 and 58 the council of Nippur rendered judgment.

"to build his house (he bade me)," Warad-Sin, Clay cone 2:5; and Canephore, 1:11. Instead of mu - hu we have here only mu (or mu - dv). The apposition ibila d Ishkur-ra-bi-gesne, li. 33, is not included in the complex of words joined together by the postposition ru.

2. No. 14.

Cession of a boundary wall,

A. a. Iz-zi ri-ba-na niq dSin-ish-me-a-ni nagar dumu Wa-ra-ru-nu ù Ma-ri-ir-si-tim $dumu \ Da-ma(?)-qu-qu$ b. 7 Ma-ri-ir-si-tim kít-babbar igi-te-bi shaq ^dSin-ish-me-a-ni nagar ne-ib-dua-ai c. nig na-me muh-na nu-tug B. a. ŭ-kûr-shû ^dSin-ish-me(-a)-ni iz-zi ri-ba-na im-mu-ta ni-dñ-e qish-dü nu-ub-dü-e qish-irr-ra nu-ub-nitahu-e $\forall a Sin-ish-me-a-ni-ge$ ₹ Ma-ri-ir-si-tim-ra nu-mu-na-ab-bi C. she-qu-ne-ne-tu mu lugal-bi in-pá(d)-dé-esh

On account of the boundary wall, the property of Sin-ishmeani, the carpenter, the son of Warazunu, and also of Mar-irgitim, the son of Dama(?)-gugu, Mar-irgitim shall satisfy the heart of Sin-ishmeani, the carpenter, with a sum for acquittance, so that he has no claim whatever against him. In future shall Sin-ishmeani build a boundary wall of his own. "A peg he shall not drive in, a beam he shall not lay on," shall Sin-ishmeani not say to Mar-irgitim. In mutual assent they have sworn by the name of the king.

Five shekels of silver in addition to the 19 shekels of silver, which in the marriage(?) document Ama-sukkat has , NinIB-mansi shall(?) to Enlil-idzu to the

The two documents are decisions of a court of justice, as is evident from the fact that in No. 14 the $r\hat{c}d\hat{u}$, and in No. 44 the *rabis daiiani* are found among the witnesses, and that the documents are not sealed by the party upon whom the obligation rests, but by the witnesses, respectively the judges. The seals employed are temple seals.

ANNOTATIONS TO NO. 14. The signification of iz-zi ri-ba-na, li. 1, is-sity) ri-ba-na, C. T., IV, 22b: 1, iz-zi ri-ba-na-na, II R., 15: 22a (- i-gar bi-ri-tim), can be no other than boundary wall, as is evident from the facts that here, C. T., IV, 22b, and R. 41 it is the common property of two neighbors, and that an izzi ribana can be sold to a neighbor (e.g., 14: 11-16). For kū-babbar igi-te-bi, cl. 26, III, 11, where a name-gala is called the igi-te ad-da-ne-ne, Cl. also the Hebrew kesid */napim, Gen. 20: 17. Nig-na-ne = minmae or minmae bashi, V. R., 11: 41, corresponds in formation and signification to a-na-me (-a-bi) = mamman. The phrases of li. 12-11 are among others set down in H. R. 14, 15, Col. IV, 36-39 for the use of scribes who had to draw up legal documents. We find there, instead of nu-nb-dū-e, nu nb-dū-a, i.e., na-nb-dū-a, the original ending e having been contracted with the preceding vowel to ū; cl. mi-ni-in-16-a, p. 31, note 1. Gishū-ra nu-ub-dū-e refers to the laying of the roof beams upon the wall, which the neighbor has of course an interest in forbidding, because the brick wall would be impaired by the additional weight. She-ga-ne-ne-ta in-pā di-de-esb, li. 19: the oath is a mutual one, because both parties assume obligations, that of Mūr-icgitim being not to revoke the compensation which he paid.

III. THE SEALS.

A characteristic feature of the Nippur documents are the seal impressions, which differ in various respects from those on tablets from other parts of Babylonia. As I have shown in another place, the seals employed in Nippur in connection with documents that were sworn to were not those usually borne by the persons who sealed the contract, but were made expressly for the occasion by an official, the bur-aul, who as such is associated in the closest connection with the dub-sar, either in the succession dubsar—burgul or burgul—dubsar, after the names of all other witnesses are recorded.² The seals made by the burgul were not engraved on such small cylinders of a very hard material as have been found abundantly in the mounds of Babylonian cities, but on small rectangular slabs, or on the rectangular side of more handy pieces of a soft material which could be cut easily. These seals, of course, could not be rolled over the tablet, but were stamped upon them, as can be seen clearly from the impressions on the case of No. 49.3 It should be mentioned also that they never contain pictorial representations. The script of the inscription is larger and less carefully made than on the cylinders.4 The seal was placed on the tablet in such a way that the inscription traversed the uninscribed parts of the surface in longitudinal direction (see Nos. 4, 10, etc., left edge; No. 35, upper edge; Nos. 33 and 32, reverse). The name of the sealing person is therefore usually reproduced in full, while on the Sippar tablets the inscription, because of its latitudinal direction, is impressed only partially, it being often impossible to make out the name (see Nos. 83 and 134, Vol. VI, Plates X and VIII^c). The inscription never contains an addition to the name

¹ Der bur-gul als Notar in Nippur, O. L. Z., 1907, col. 175-181.

² But before the female witnesses, cf. 6: 24, 25. Exceptions to the rule we find only on Nos. 39 and 40. In the first instance the bargal is separated from the dubsar by but one person; in the second he occupies the regular place of the official persons at the end of the list of witnesses. Compare also C. T., 32c: 18 and 19 (Sippar), where the bazanu (li. 18) and the dubsar (li. 19) follow the male witnesses (li. 14-17), but precede the female witnesses (li. 20 and 21); the same persons occur R., 22: 25 and 26 after the witnesses 17-24. In the Tell Sift documents the bazanu is usually the first witness and in one case also the scribe.

³ See Plate II and compare with Vol. VI, 1, Plate X.

⁴ Cf., e. g., No. 6 with Nos. 29, 70, etc.

⁸ Only then the inscription has a latitudinal direction when so much space was left that the inscription could be reproduced in full (or nearly so). Cf. No. 34.

⁶ On the tablet from Yokha (No. 8) the seal impressions show the same direction as on the Nippur tablets, and likewise (but sometimes only partially) on a considerable number of tablets in the Berlin Museum which I have examined. This fact should be noticed in the determination of their provenance.

denoting a religious confession, like "servant of this or that divinity," which is so frequently found on cylinders, but confines itself, on account of its official character, to strictly legal designations, *i.e.*, the kunya; and not infrequently the statement of the vocation, which stands before the kunya, e.g.:

The most remarkable feature, however, is that the names of all the persons forming one party of the treaty, and in connection with division documents the names of all parties concerned, are united on one seal, which would have been an impossibility if the seal had not been made for the one special occasion. A very instructive example we have in the division document No. 32, the seal impression of which reads:

A -bil- dMar -tu
Li-bi-it- ^d Mar-ta
Li-hi-it- ^d En-lil
^d Mar-tu-ma-lik
damu-mish E-ri-ish-su-ma-tum

The deeds of purchase Nos. 33–35, in which the eldest of these brothers buys back the shares of his co-heirs, however, are sealed respectively:

^d Mar-tu-ma-lik	Li-bi-it- ^d En-lil	Li-bi-it- ^d Mar-tu
dumn E-ri-ish-zu-ma-tum	dama E-ri-ish-shum-ma-tum	dumu A-bil- ^d Shamash

Compare also the adoption document No. 24:

E-a-i-din-nam
dumu 1b-ku-1shtar
ù Ku-ri-tum dam-a-ni

It is remarkable that such seals were cut by the *burgul* even for the temples, or, using the Babylonian way of expressing it, for the gods, when they were the parties on whom the obligation rested. Thus No. 66, where the temple of *Enki* and *Damgalnunna* sells offices of the temple, is sealed:

d - En - ki	
^d Iram-gal-nun-na	

For those contracts, however, in which both parties undergo obligations the *burgul* made two different seals. Cf., *e.g.*, the seal impressions on the marriage contract No. 40:

dEn -lil-id-z n	1	Ama-sukkal
dumu Lugul-á-zi-da	and	$dnma\text{-}sal(^dNin\text{-}IB\text{-}ma\text{-}an\text{-}s)$

and on the deed of exchange No. 39:

^{d}En -lil-lii-shaq		Hu-shu-ba-ni
nu-csh	and	duma U-ta-qàl-lu-me-DU
dumu ^d .		nama (t-ra-gm-en-me-tre

The seals used with contracts that were not sworn to, or such documents as were sealed by the witnesses, were private seals (cf. 22, 62, on page 55, etc.). It is a fact, well known from Sippar tablets, that only a comparatively small number of persons carried seals containing their own names, but most of them such as either had formerly belonged to other persons, containing the names of these, or had no inscription at all.² A considerable number of seal impressions shows only the picture and the name and the titles of a god.³ The scanty material at our disposal does not permit us to decide with absolute certainty whether this peculiarity explains itself simply by the character of the seal as a charm, or whether they, like the above mentioned burgul seal of Enki and Dangalnunna, are temple seals, and were used by the persons who held office in the respective temples. But the frequent occurrence of one and the same god on different seals leaves but little doubt that the first view is the right one.⁴

With some tablets the whole surface is covered with seal impressions, the traces of which can clearly be seen between the script.⁵ These seal impressions were made before the tablets were inscribed, because the script shows no sign of derangement. This seems to be the case also with those tablets on which the seal impressions are

¹ Cf., e.g., No. 62, seals a and b.

² For the first kind see No. 62, seal c; for the second No. 25 (and No. 83).

³ No. 29: ^dShe-tir (lease of field); No. 30: ^dNin-shah and ^dPa-bi(l)-sag; No. 14: ^d-?-a-ub-gal and ^d (= seals of two witnesses); No. 42: ^dLugal-csh-a (= seal of the witnesses); No. 47: twice ^dNin-shah and ^dLugal-csh-a (seals of three witnesses), besides the seal of the scribe; No. 58: one seal of the witnesses and one of ?; compare also No. 74, seal a: ^dNin-shah | sukkal-zi-an-na | geshdar-azag shu-..., and similar ones in De Clercq, Cullection.

⁴ It is of some interest to notice that the seal of No. 29 with the picture and the name of the god of grain, ^dShc-tir, belongs to a farmer. Especially frequent are seals with the name of Nin-shah, the god who listens to the prayer (cf. Rim-Sin, Clay cone 7).

⁵ See the photographic reproductions on Pl. I, II and III.

made only on the blank spaces. Contrary to the custom prevailing at Sippar of sealing only the case and leaving the tablet unsealed, in Nippur the inner tablet was sealed also.

The following gives a list of the inscriptions of burgul seals on tablets in the Imperial Ottoman Museum, which my time did not permit me to copy:

Α.

¹ As ki-gub-ba means "manzaza," ki-lugal-gub-(b)a and ki-B.1D-gub-(b)a probably denote the places where the king and the have their stands or seats, which is confirmed by the fact that in Ad. 6 ki-B.4D-gub-(b)a appears as apposition to gubh gu-za. Lugal refers evidently to the chief god of the temple (cf. Gud., Cyl. B. 16:16). According to Si. 8, Ad. 15 and Az. 13, the stand of the god was or contained a representation of mountains and rivers that earry exuberance and abundance (Si. 8). Compare to this the representations of god's sitting on a throne, below which there runs a river with fish in it. (An explanation, "a brazen vessel or the like, erected in the ki-lugal, corresponding to the construction of gu-za gub-lua-bia-bi, nh(d)-bi ki-nh(d)-a gub-ba-bi and zi(d)-da BI-da-ba gub-ba-bi, Gud., Cyl. B, 16:17, 19; 17:9, seems to be out of question, because uradu is wanting several times, e.g., IV, 17c, VI, 33c; P. 80 and M. 9, and ki-lugal-gub therefore must be considered as the principal idea. Besides, there is no a after ki-lugal or ki-B.ID indicating the idea of locality, and also the co-ordination with du-mah and uradu-du-mah speaks for uradu being a determinative.)

The $d\tilde{n}$ -mat, which here is closely connected with the ki-lugal-gub (bi denoting a close connection, while \tilde{u} expresses a contrast = "not only, but also"), is in Az. 11 mentioned alone as an object of dedication. In this passage it likewise is or contains a representation of mountains and rivers.

² See L. I. II., III, p. 233, note 51.

The year in which *## Jammu-rabi* after having the foundation of the wall of Sippar, ———

- 24. $[mu^3, \ldots,]^d En-lil-ra$ A.; B.; C.
 - (?) mu bara-mah dEn-lil mu-na-dím (cf. H. 18). VIII, 43c (Sippar).

The year in which (Hammu-rabi) — — — for Enlil.

⁴ Alu is never used as a mere determinative; here it seems to be a part of the name of the town which means "town of Bazum" (notice the genetive Ba-zi; Bazum = personal name),like A-al-dGait²dSin, doorsocket of Arad-Nannar, 2:2; Al-Ur-dM.18H, B. E., Series A, XIV, 114:11; Al-Tukul-ti-E-kur^{ki}, 128:2, etc. For the personal name Bazum compare Ba-a-zi (genetive of Būzum, Cassite time), B. E., Series A, XIV, 16:3, the hypocoristic Ba-zi-a, P. N., and the feminine name Ba-za-tum, P. N.

² It was before this statue that <u>Hammurahi</u> set up the stele on which was written his code of laws. <u>A-va-ti-ia</u> shu-ku-ra-tim i-na na-ru-ia ash-ṭur-ma i-na ma-har galmi-ia shar mi-sha-ri-im u-ki-in, C. H., 21:74-78. This statue of <u>Hammu-rahi</u> stood in Babylon in the temple <u>E-sagil</u> (cl. C. H., 24:59-25:58; see A. H. Godby, "The Place of the Code of <u>Hammu-rahi</u>," in <u>The Monist</u>, ed. P. Carus, Vol. XV, No. 2, pp. 199-226, Chicago, 1905).

² A. space for one sign; C. for two. B. has before this line still another one: [. Z]imbir^{ki}-ra.

The year in which *Hammurabi*, the king, after having dug the canal, "Hammurabi is the abundance of the people," which brings the flood for *Enlit**

⁴ Strassmajer's copy has Ana Ana dEn-, etc.

² Or "the flood of Enlil"? This might be an allusion to the deluge story. Cf. Gud., Cyl. A, 1 : 9.

³ Compare the partly parallel passage, Louvre Inser, Obv. 17–22: mir Ha-am-mu-ra-bi nu-lju-ush ni-shi bu-bi-la-nt me-e lje-gal a-nu mit Shu-me-ri-im ù Ak-ku-di-im lu nlj-ri. According to the attribute of the canal in the above date formula, it seems to have run past Nippur on its way to Shumer. The compound substantive shay-gi-rā-a forms a genetive (s'a'us cons'ructus) connection with dEn-lil-lā. The same construction, e.g., limestone tablet of Hammu-rubi from Hallab, 11:12: sib shay-dug dMarduk-ge; nun shay-dug-dug dEn-lil dNin-lil-bi = ru-bu-u mu-tib lib-bi dEn-lil u dNin-lil, 1V R., 12:9, 10.

¹ That this date belongs to the later part of *Hammarabi*s reign ensues because of the following reasons: 1. *C. T., VIII, 22c: 3, 5, a married woman bears the name "Hammarabi-sharri"; this points to a time after, at least, the 11th year of *Hammarabi*. 2. The Tell Sift contracts S, 31 and M, 27 are dated in this year; but Southern Babylonia came definitely under the sway of *Hammarabi* only after his 29th or 30th year. 3. *Sin-rimeni *hazinn* and *Ihiq-Aiia dub-sur* (R., 22: 25, 26) occur C, T., VIII, 32c: 23, 24 (10th year of *Samsu-ilnua*), and the latter also *C. T., 11, 5: 31 (9th year of *Samsu-ilnua*).

On the geographical position of Mari see Weissbach, Miscellen, p. 13.—From the inscription of Shamash-resh-ngar it ensues that it is near the territory of Suhi, of the position of which on the middle Euphrates not far from the mouth of the Habur the inscriptions of Assyrian kings leave no doubt.—As a special kind of boats was named after Mari, it was evidently situated on the Euphrates, probably somewhat farther down the river. The year in which *Ḥammu-rabi*, after having destroyed the wall of *Mari* and *Malkâ* upon the command of *Anum* and *Ellit*.

ta ' á-kal gal-gal ^aMarduk-ka-ta^s

⁴ Transcription and translation are mere attempts.—Is this formula identical with that of the 28th year?

 $^{^2}$ Mentioned C, H_{γ_0} 4 – 3. Or Mashgan-sharri?—The sign is much effaced.

⁵ The three consecutive years a = a + 2 seem to belong to the earlier time of Abi-eshu', since R, 70 records a purchase of fields in the a + 2d year of Abi-eshu' in connection with such purchases in the 28th and 31st years of Samsu-iluna.

^{*} bi-da probably mistake of the scribe,

⁵ The copy shows bu-e for the two last signs.

17.	mu á-kal-maḥ-a ^d Babbar ^d Marduk-bi-da-ge mu Am-mi-di-ta-na lugal-e á-kal-maḥ-a ^d Babbar ^d Marduk -bi-da-ge	E. P. 108.

¹ Za-e DU-DU-ne is the beginning of the inscription on the statue. For the second person in inscriptions on statues compare the bilingual hymn inscription on the statue of Hammu-rabi beginning ^dEn-lil 6-le-lu-tam id-di-ik-kum at-ta ma-an-nam tu-ga-a; this statue, moreover, shows us what an alam nam-shul-a-ni (edilūtishu, Ad. 14), nam-ur-sag-gà (qardūti, Ad. 34), nam-nir-gāt-lu-ni (etellūtishu, Az. 9), nam-lugul-a-ni (sharrūtishu, Ad. 8), nam-nun-na-ni (rubūtishu, Ad. 5) was, viz., a statue with an inscription which glorifies the exploits of the king.

V. THE NAMING OF THE YEAR AFTER EVENTS.

1. In the explanation of the date formulas some difficulty has been found with regard to the time of the events mentioned therein. The question has been asked whether they fall within the year which is named after them, or whether they occurred in the preceding year. Closely connected with this is the question as to the time of the naming, resp. the possibility of a renewed naming in the later part of a year.

A priori we may consider it a necessity for a land with such a highly developed commerce and law as Babylonia was, that the formulas were made known as early as possible, at least no later than the first day of the new year. This assumption is fully corroborated by the observation that a number of tablets dated on the first of Nisan¹ show the new formula. Therefore there can be no doubt that such tablets as have been preserved of the 29th year of Ammi-ditana and of one year of Samsuditana,² which contain the full and in the one case also an abbreviated formula of the year in Sumerian, with a translation in ''Akkadian,'' were sent to the various cities and temples before the beginning of the year.

The events after which the years were named may be classed into two kinds, such as consist of an act that could be performed on one single day, and at any desirable time, as, e.g., the dedication of a votive statue, of a weapon, or of a throne for a god; and, on the other hand, such as either it was beyond one's power to fix on a certain day or that needed a long time for completion, as, e.g., historical events, the capture of hostile cities and princes, or the digging of canals, the building of city walls and fortresses, of temples and stage-towers. The explanation of date formulas referring to events of the first kind presents no difficulty, e.g., Az. 4: mu Ammizaduga lugale shunir galgalla Ésagillashu innentura, "The year in which Ammi-

¹ Ungnad in Die Chronologie der Regierung Ammiditana's und Ammisaduga's (= B, A., VI, pt. 3), p. 7, enumerates R. 31 (H, 43); IV, 44c (8i, 7); Fr. 19 (= Scheil, 267!; Ad, 34); Berl. 5833 (Ad, 37); 5875 (Az, 5); M. 63 (Az, 10?); Berl. 5910 (Az, 16); 5900 (Az, 17 + b); 6115 (Az, 16 + c); to which may be added P, 84 (8, 15). Ungnad (l.c., p. 7) considers it a possibility that for some reason or other the documents might have been dated back, but considering the character of the documents as being sworn to and sealed in the presence of the parties and witnesses, this is scarcely plausible.

² Berl. 670 (published by F. E. Peiser, Zur altbabylonischen Datierungsweise, O. L. Z., 1905, 1; by ⁴. Ungnad, B. A., Vl, pt. 3, p. 47) and Berl. 1200 (published by L. Messerschmidt, Zur altbabylonischen Chronologie, O. L. Z., 1905, 268ff.).

zaduga, the king, has brought into E-sagil great emblems." This phrase clearly implies that the act referred to took place within the year in question. Now we know that in later times in Babylon the beginning of the year was celebrated with great religious ceremonies, and that the king himself took a prominent part in them. Therefore, we are hardly wrong in assuming that the king dedicated the statue, throne or the like on New Year's day, the event being thus within the year to which it gave its name, and, nevertheless, so early that not one day of the year was left unnamed. This assumption becomes very reasonable from the fact that by far the greater number of formulas refer to actions of a religious character. Undoubtedly the royal authorities and the priesthood knew the program of the New Year's celebration, with the acts planned by the king, a sufficient time before, and could make use of it in the naming of the coming year.

The difficulties arise with those formulas which refer to events of the second class. The building of temples, the digging of canals, etc., could not be achieved within the year except after considerable time, and although these works might have been planned, it would nevertheless have been rather hazardous to name a year after a future event, the completion or even the beginning of which might be interfered with sometime during the year by some unlooked-for condition of affairs, quite apart from the fact that such an explanation is impossible where historical events are concerned. There is a possibility, and in some few cases it is even likely, that the formula was promulgated in a later part of the year after the historical event had taken place, but as a general custom this procedure is very improbable, and at least in one case impossible, because the formula which mentions the historical fact is found on a tablet of the first of Nisan.

The solution of the difficulties is that the date formulas mentioning events of the second class are incomplete, and that they recorded in the missing part some religious act, probably the offering of some votive object which alone took place on New Year's day, and thus in the year of the formula, while the events mentioned before this religious act had occurred in the past, *i.e.*, in the previous year. We should therefore not translate "year in which Hammu-rabi vanquished Rim-Sin," but "year in which Hammu-rabi, after having vanquished Rim-Sin, brought before Anum and Ellil some object of the booty or some votive object." The correctness

⁴ That a solemn ceremony was performed in which the year was named, besides the regular New-Venr's celebration (Ranke, B. E., Series A, VI, 1, p. 13), it is unnecessary to assume, and such is by no means likely to have taken place.

³ Berl, 5833 — Ad, 37; Unguad should not conclude from this fact that the forcible capture of a fortress which another king had fortified is not an historical event. On the contrary, his assumption that historical events mentioned in dates must have occurred in the year of the formula is to be modified.

of this explanation is proved by the observation that the verbs relating the dedication, etc., of objects on New Year's day stand in the perfect tense, those relating historical events, however, in the historical tense, which, as I have tried to show in Z. A., XXI, p. 224ff., denotes the difference of time when it is contrasted with perfect tenses. An illustration for this we have in the complete date formulas of Ammiditana, Berl. 670 (= Ad. 29), and Samsu-ditana, Berl. 1200. There the dedication of the tutelary deities and of the sun-disks on New Year's day is recorded in both instances by the perfect in-ne-en-tu-ra, but the making of the votive objects, which took place before New Year, i.e., in the preceding year, by the preterit ne-in-dimdim-ma-a (Berl, 670) and ne-in-dim-ma-a-an (Berl, 1200).* As a still more instructive example Ad. 8 may be referred to, because there we have abbreviated formulas closing with a perfect and with a historical tense, besides the full formulas. It would certainly be wrong to translate mu Ammi-ditana lugale alam namlugalana shunendua by "the year in which Ammi-ditana caused his image, etc., to be formed," since not this action, but, as is shown by the other formulas, mu alam namlugalani E-babbarrashu innitura (E) and mu Ammi-ditana lugale alam namlugalana shua nendŭa E-babbarrash innanitura (Berl. 6091), only the dedication took place in the year designated by the formula. By reversing this observation we obtain, therefore, the rule that all the actions expressed by a verb in the perfect occur in the year of the formula; those in the historical tense, however, in the previous year (or years).

From this discrimination it follows that, e.g., the capture of Isin by Sin-muballit, which is related by the formula mu $Isin^{k_0}$ indib (M. 32), occurred in the 17th, not in the 16th year of Sin-muballit, and similarly the conquest by Rim-Sin in the year designated as mu $Isin^{k_0}$ uvu namlugalla indibba. Of a considerable number of formulas containing historical facts, as, e.g., Si. 9, mu ugnim Kashshū; Si. 10, mu ugnim Idamaraz, etc., unfortunately the verb is still wanting, and a definite decision is consequently not possible.

2. The first year named after a king was not the year of his accession to the

⁴ I-ni-in-tu-ra, etc.; in-na-an-dur-ra, Ad. 14; in-na-an-bil-a, Si. 39.

² Mn-un-gul-la; mu-un-dū-a; mu-un-bu-la; mu-un-d-la, mu-un-bil-n-un(?), II, 34; nc-in-gul-la, Ad, 37; nc-in-dū-a, Ad, 20; nc-in-sū-a, H, 35; gish-nc-in-ra-a, II, 39, qish-hash nc-in-ug-a, Si, 29; nc-in-bil-a, Si, 15; nc-in-tu-ra, Si, 13; nc-in-sì-sì-qa(-a), Si, 20; ki-nc-duq, II, 31; mi-ni-in-dun-na.

^{3 &}quot;Das Verbum im Sumerischen," Z. A., XXI, 216-236.

⁴ Cf. the translation ib-ni-i-ma and ib-nu-u-ma; ma denotes the difference of time.

⁵ The observation of Ranke, who concluding from the occurrence of the formula mn ns-sn yn-zn bara-mah dLuynlgi-dă-a, places the conquest of Isin by Sin-muballit in the time between Nisan(!) 6th (or perhaps better 1st) and Adar 13th, is thus fully corroborated.

throne, but that which began with the first of Nisan after his accession. The year of accession, which practically in all cases had been named after the then still living former king, probably continued to be designated with its old name even after the death of the king, the formula mu K and bit abishu irubu, which corresponds to the later mu sag namlugalla K, being either employed only during the earlier time of the First Dynasty or besides the regular formulas.

The year beginning with the following first of Nisan was not called officially mu K lugal-c, but was designated by a complete formula like all other years. Compare

Sumu-alm:

Sumu-lail: mu Sl. lugale id "Babbar-hegal munbal

Zabium:

Abil-Sin: mu A-S. lugale [ba]d Barz[i^{ki} badū] Sin-muballit: mu Sm. lugale bad Rubatum badū

Hammu-rabi: mu II lugale (D)

Samsu-iluna: mu Si, lugale dugga zida ^aMardukkata

namenbi kurkurra (PAca) (C)

Abi-eshu': - --

Ammi-ditana: mu Ad. lugale adgia gula ^dMardukge (E, B)

Ammi-zaduga: mu Az. lugale ^dEnlilli namennani (nebgulla) (E)

The formula mu K lugale is therefore only an abbreviation. Its shortness, in comparison with the abbreviations of the following years, is accounted for by the fact that it is the first formula that mentions the name of the respective king. This observation furnishes us with a principle to assign to their proper years contracts dated, e.g., mu id Hammu-rabi, where we have the choice between the id Hammu-rabi-hegal and the id Hammu-rabi-nuhush-nishi. Such formulas can only refer to the first date that mentions a canal or a statue, etc., of the king or god; mu id Hammu-rabi being thus the 9th, not the 33d year of Hammu-rabi.

 $^{^{1}\,\}mathrm{See}$ Ungnad, $l.c.,~\mathrm{pp.}$ S, 9.

VI. OUTLINE OF THE POLITICAL HISTORY FROM SIN-MUBALLITS SEVENTEENTH YEAR TO THE END OF THE FIRST DYNASTY.

The political development during the second half of the First Dynasty forms a very interesting chapter of the history of Babylonia, showing us how in those times the North and South rivalled each other with changing luck in the endeavor to win the supremacy of Babylonia. Unfortunately our sources for a reconstruction of the history of this time are still very scanty, and in many instances it will only be possible to arrive at a more or less great probability. Nevertheless, the recent discovery of historical references bearing on the subject, the realization of the statements of the date lists and dated contracts, and not least the fact that in some few cities we can ascertain the succession of kings by means of tablets dated in their reign, enable us even now to establish an outline which in the main will prove correct.

We take our start from the facts, gathered from dated tablets and Date List A, that Sin-muballit, king of Babylon, in his 17th year, and likewise Rim-Sin, king of Larsam, some time later, took possession of Isin, which city in former times had been the capital of kings of Shumer and Akkad for 225 years. There is not the slightest indication that these two events should be considered one and the same, and that Sin-muballit achieved his deed either as the vassal or as the ally of Rim-Sin. As the date Sm. 20: mu ugnim Larsam^{ki}, "when (Sin-muballit defeated) the army of Larsam," shows, and as can be seen from the later development, the king of Babylon was rather the political adversary of the king of Larsam, and his rival for the dominion over all of Babylonia.1 The events prior to and following the first conquest seem to have been these: In the 13th year of Sin-muballit the army of Ur, which of course is not identical with that of Larsam, invaded the territory of Babylon, but was driven back by Sin-muballit, whose political influence in the course of the following four years rose to such an extent that in his 17th year he could occupy the city of Isin. That Sin-muballit's power had been growing steadily for a long time is indicated by the fact that he built or fortified anew quite a number of for-As Sin-muballit never mentions military conquests, undoubtedly the rise tresses.2

¹ Cf. the remarks of Thureau-Dangin in O. L. Z., X, 256 f.

² In his 1st, 7th, 10th, 11th, 12th, 15th and 18th years.

of his power had its origin in advantageous political constellations, for which the temporary independence of Ur, besides the kingdom of Larsam, which we must infer from its military enterprise against Sin-muballit, accounts sufficiently. But there can be no doubt that also Kesh and Uruk, before they were conquered by Rim-Sin, were independent kingdoms, Babylonia thus being divided into several small states.

After Sin-muballit's conquest the kingdom of Larsam under Rim-Sin had risen to a dominating position, and made this felt by an attack on the kingdom of Babylon. The campaign was successful inasmuch as the old renowned city of Isin, occupied before by Sin-muballit, fell into the hands of Rim-Sin, who regarded this success, it seems, as his greatest deed, because thenceforth he counts his years of reign after the capture of Isin. But, on the other hand, he failed in his endeavor to overthrow the kingdom of Babylon. The invading army was routed by Sin-muballit, over which deed this king glories in the date of his 20th year.

In consideration of this we should place the capture of *Isin* by *Rim-Sin* in *Sin-muballit's* 19th year, and from the following calculation it will be seen that this is indeed approximately the right time. For *Hammu-rabi* conquered Southern Babylonia in his 30th year, and dated tablets from *Nippur* and *Tell Sifr* show that from that time he actually ruled over these cities at least in his 31st, 33-39th and 41st years, while *Rim-Sin* ruled over the same cities (and *Yokha*) in the 18th, 21st, 23d, 25th-28th and 30th years after the capture of *Isin*. These facts can be combined only by placing *Rim-Sin's* thirty years of reign before *Hammu-rabi's* 30th year. The conquest of *Isin* would then have occurred no later than the last year of *Sin-muballit*, and may have actually occurred in his 19th year.

In consequence of his method of dating his years of reign, we know practically nothing of *Rim-Sin's* enterprises during the thirty years after the conquest of *Isin*. The first five years of *Hammu-rabi* went by either without an important event, or with such events as were not favorable for *Hammu-rabi*, so that he could not boast of them in the names of years. But in his 6th year he conquered or occupied *Uruk*

Compare the date of Rim-Sin, in which he states that in the temple of Nin-mah in Kesh he was raised to the kingdom over the totality of the land, corresponding to the sharril kishshati, and notice, moreover, the fact that Upiki occurs frequently as part of personal names instead of a divinity during the time from Zobium to Hammu-rabi (and partly Samsu-iluan). This presupposes that Upi was during the time from Sumulail to the end of Sin-maballit's reign the capital of a kingdom and as such was worshiped as a divinity.

[?] The years of Hammurabi and Samsu-iluna, as late as the latter's second year, which occur on tablets from Tell Sife and Nippur, will be seen from the following list: H. 30 = -, = (31 T. S., = (32 - , -, (33 - , N.; 34 T. S., -); 35 T. S., N.; 36 T. S., N.; 37 T. S., = (38 T. S., N.; 30 T. S., N.; 40 = -; 11 T. S., N.; 12 - , -; 13 - , -; 8i.1 T. S., N.; 2 = -. There are tablets dated in the reign of Rim-Sin of the 1–9th, 11th, 13th, 18th, 21st-23d, 25th–28th and 30th years after the occupation of Lsin.

and Isin, thus repeating the attempt of his father to extend his power over the South. In the following year he even directed, it seems, an expedition against Emulbal, the land of Rim-Sin's father. This expedition, though somehow successful, was probably far from humiliating Rim-Sin, since we have tablets dated in the 9th, 11th and 13th years of this king. How long Hammu-rabi could maintain his conquest we do not know, but we may conclude that at least in his 9th year he still maintained it, since the canal Hammurabi-hegal, which he built in this year, was probably intended to procure, like later the Hammurabi-nuhush-nishi canal, prosperity to a newly acquired devastated territory.

In the 9th year, *## Jammu-rabi* seems to have destroyed the town and the people of *Malga*, the city of *Ea and Damkina*, which at some time was the seat of a kingdom.

The 10th year is marked by an enterprise against or in the cities of Rabikum and Shalibi, the former being described in the date of the 35th year as situated on the bank of the Euphrates. The notice of this enterprise, although most fragmentary, is of eminent value for us, because it opens up for us a view into the close connection of the middle Euphrates valley with Babylonia. Rabikum and Shalibi, the latter of which seems to be represented by the present ruins of Zelebiye on the left bank of the Euphrates, half way between the mouths of the Balih and of the Habur, commanded the water-course of the Euphrates, the important natural commercial route between the Westland and Babylonia, and it is easy to understand that the Babylonian rulers strove to maintain control of the river by occupying the chief towns along its course. A tablet in the British Museum is dated after the capture of Rabikum by a certain Ibiq-Ishkur.² If we are allowed to see in this the beginning of a fuller form of the date of the 11th year, it would appear that Hammu-rabi was prompted to take his action because Ibiq-Ishkur, by means of this fortified town, could control the Euphrates against the Babylonian merchants.

The dates from the 12th to the 29th year record no military success, a sure sign that Hammu-rabi's position had suffered a total change. Without doubt Rim-Sim had won back his former power and possessions. Only gradually Hammu-rabi's influence rose again, as can be observed from his building fortresses in his 19th(?), 21st and 27th years, and his fortifying Sippar in his 23d, 24th(?) and 25th years, the latter presupposing perhaps a previous destruction or devastation in warfare.

The period of *Hammurabi's* great and lasting successes begins with his 29th year. In this year he defeated an army of the Elamites, the people that since the oldest

¹ See the inscription of *Ibiq-Ishtar* in *Vorderasiatische Schriftdenkmaler*, I, No. 32.

² According to King in L. I. H., III, pp. 238f., note 72.

times had invaded and ransacked Babylonia. That they came as allies of Rim-Sin is an unproved assumption, and is very unlikely, since Rim-Sin's mother-country was Emulbal, not Elam. The real state of affairs was undoubtedly this, that Rim-Sin's empire, as being nearest to Elam, had to suffer the first attack from the invaders. After they had overthrown Rim-Sin's army, but probably had suffered themselves through the resistance of the South-Babylonians, it may have been easy for Hammurabi to rout them and expel them from Babylonia. Never before, it seems, was Hammu-rabi offered such occasion to realize his and his father's aspirations, the dominion over all Babylonia, as now by Rim-Sin's weakness and his own success. He exploited fully his advantage. In the following year, with the help of Anum and Enlit, as we read in the date formula of the 31st year, his hand slew to the ground the land Emulbal and king Rim-Sin. From this time Hammu-rabi was ruler over all Babylonia. The chronicle records the same event with the words: "Hammu-rabi, king of Babylon, summoned his people and against Rim-Sin, king of Ur, he marched. Ur and Uruk did his hand conquer and their property he took to Babylon."

It seems that Ashnunnak, which probably also at that time was ruled by patesis, made likewise an attempt to profit from the troubles in Babylonia; for in the following year an army of Ashnunnak appears in Babylonia, but is defeated by Hammu-rabi. From the next year Hammu-rabi begins his works of peace. He dug (in the 32d year) the canal Hammurabi-nuhush-nishi, which from Akkad went past Nippur down to Shumer, carrying waters of exuberance along with it. He tells us, and we may well believe him, that the people of Shumer and Akkad had been scattered; he gathered and settled them in towns and cities along this canal. He rebuilt temples, e.g., E-mete-ursag (41st year) in Kish, the temples in Larsam, in Halab, etc. He built new fortresses, like Dur-Sinmuballit at the head of the Hammurabi-nuhush-nishi canal (i.e., where this canal leaves the Euphrates), the great castle Kar-Shamash on the bank of the Tigris, and refortified the city of Rabikum on the bank of the Euphrates in the 36th (or a later) year.

This latter notice shows us that <code>Hammu-rabi</code>'s power extended far beyond the boundaries of Babylonia proper. The possession of <code>Rabikum</code> proves that the middle Euphrates valley was again in his power, and undoubtedly <code>Kar-Shamash</code>, which is mentioned with <code>Rabikum</code> in the same date formula, occupied the same position in the upper valley of the Tigris' as <code>Rabikum</code> in the valley of the Euphrates, <code>i.c.</code>, it

⁴ Cf. Thureau-Dangin, Une incursion elamite en territoire sumérien à l'époque présargonique, R. A., VI, 1, pp. 7-40.

 $^{^{2}}$ The following line is partly broken. The title king of Ur is of course a mistake.

³ Louvre, I, 2: 1-16. Cf. also mupahhir nishi saphitim sha Isin^{ki}, C. H., 2: 19-51.

A See the inscriptions on bricks,

⁵ The date formula states that Kar-Shamash is situated on the bank of the Tigris.

secured the other natural commercial route down the Tigris; for we know from his Code of Laws that *Hammu-rabi* ruled over the city of *Ashshur*, to which he returned its tutelary god, and over *Ninerch*, where he richly endowed the temple of *Ishtar*; moreover, the directions in the letters to *Sinidinnam* in *Larsam* as to the employment of a detachment of *Ashshurites*, give evidence that the king actually exercised his power over these cities.

Other military enterprises of *Hammu-rabi* are the conquest of *Mari* and *Malgi* in the 36th year, an expedition against (or the achievement of some work in) *Ashmunnak* in the east in his 37th year, and the subjugation of the whole steppe, *i.e.*, Mesopotamia with its hostile tribes, in the 38th year. These tribes perhaps are also to be identified with the people of *Turnkkum*, *Kagmum* and *Subé*, whose bands were defeated in the 38th year. For the people of *Mera* and *Tutul* see *C. H.*, 4:30.

Thus at the end of <u>Hammu-rabi</u>'s reign his dominion extended over the whole territory from the Persian Gulf as far northwest, perhaps, as *Charchenish* and *Duarbekr*.

When Samsu-iluna inherited his father's kingdom, he took also the charge upon himself to maintain <u>Hammurabi</u>'s conquests. This was no easy task, and his reign is, as we shall see, largely filled up with suppressing revolts and warding off attacks from outside. His very year of accession to the throne and his first year are marked by conflicts, for in the date of the first year he glorifies in having made his dominion shine over the lands, at the true command of <u>Marduk</u>, which implies that he had first to establish it outside of Babylonia proper; and in the date of the second year he asserts that he liberated <u>Shumer</u> and <u>Akkad</u>, which presupposes that it was occupied by a foreign power. Probably at that time the events recorded by the chronicle took place, in which either the old <u>Rim-Sin</u> or one of his family played a part. Apparently it was an attempt to regain the kingdom of <u>Shumer</u> and <u>Akkad</u>. At any rate it failed. <u>Samsu-iluna</u> conquered the city of his foe and captured him alive in his palace. Unfortunately the continuation of the chronicle is only fragmentary.

Samsu-iluna, as was customary after successes, endeavors to make his land prosperous by digging two canals, Samsuiluna-nagab-nuhshim and Samsuiluna-hegal. As far as we have any knowledge, peace and prosperity reigned in the land up to the 8th year, when a period of war sets in that extends over a time of six years, and is marked by the defeat of Cassite invaders in the 8th or 9th, of an army of the city of Idamaraz in the 9th, the capture of Ur and Uruk in the 10th, the subjugation of insurgent lands in the 11th, the capture of Kisurra and Sabum in the

¹ At that time Rim-Sin would have been at least about 20 + 6 + 2 + 43 + 1 = 70 years.

12th, and the suppression of an insurgent king in Akkad in the 13th year. This long war or series of wars, the details of which unfortunately are unknown to us, ended, it seems, with the complete success of Samsu-iluna. But Babylonia in all likelihood lay waste when peace was again established in the land. Besides the cities conquered by the king also Isin and the fortresses of Emutbal had been destroyed either by Samsu-iluna or his foes. Their fortifications were restored in the 14th and the 16th year, and the construction of a wall of Sippar in the 15th year may suggest that even this city had suffered devastation. Nor can it be accidental that the tablets from Tell Sifr, existing abundantly for the first decade of Samsu-iluna's reign, cease completely after the 10th year—a sure indication that the small town was destroyed and abandoned by its inhabitants.

The period of peace from the 14th to the 26th year is only interrupted by the suppression of an uprising in one of the foreign lands in the 19th and an expedition against the foreign(?) cities Sa'nā and Zarḥanum in the 22d year. In connection with the last achievement Samsu-iluna calls himself lugal sag-kal, the supreme king. We also receive the impression that at that time Samsu-iluna stands at the height of his power, and moreover reigns in peace, from his statement in the date of his 25th year, that he caused a stone of about eleven metres in length to be brought to Babylonia from the great mountain of the Westland.

Some great disturbance seems to have occurred in Samsu-iluna's 28th year; for the 29th as well as the 30th year are dated after the formula of the 27th year, which indicates that in those years the king was prevented from dedicating a votive object, or even from participating in the New-Year's celebration. Probably he was engaged in an unfortunate war. The 27th year perhaps still brought success, as we conclude from the formula of the 28th year: "year in which Samsu-iluna after having—upon the oracle of Enlil,———." Unfortunately we do not possess as yet the continuation of this formula, but if the date of P. 40 is to be assigned to the 29th year," Samsu-iluna in his 27th year vanquished a certain Iadih-abu and perhaps one

⁴ In the 20th year some catastrophe seems to have befallen Nippur, because the three baked duplicate tablets, Nos. 52–54, were found at one place, and moreover one of them is broken into two pieces, only one of which is burnt. Perhaps this fact points towards a conflagration of the city caused by enemies.

² Like the Westland mountains *Basalla* and *Tidanum*, from where Gudea procured certain stones, Stat. B., 6: 15, 13, this great mountain of the Westland may be sought for somewhere in the vicinity of the *Amanum*, Gud., Stat. B., 5: 28. Should it be the Taurus? From there almost the entire trip could be made on rafts down the Euphrates and the canals in Babylonia.

³ The date of this tablet is later than the 12th year, because Mannummeshalizar, who buys a building lot according to No. 38 (Du'uzu 6, 12th year), is already dead according to No. 61 (a house, perhaps erected on that building lot, is sold by the brother, the son and the wife of Mannummeshalizar). As all the following years are named with official formulas that do not seem to allow an identification with ours, and as there is only the one ussa date of the 29th year, we should

Mutihurshana. The issue of the struggles of these years was certainly unfavorable for Samsu-iluna, because also the date of the 31st year makes, as far as we know, no allusion to political events. It is, therefore, not improbable that this is the time of the unfortunate conflict with Iluma-ilum, the first king of the so-called Second Dynasty.

The very fragmentary report on this and the immediately preceding events in the Chronicle opens with a battle on the shore of the Persian Gulf, which ended with a victory for Samsu-iluna. We may conclude this from the words: their dead bodies (i.e., of the enemies) the sea [carried away]; for we would not expect such a detailed feature if the Babylonians had been defeated. As the passage is incomplete we are left in doubt as to whether Samsu-iluna was already at that time fighting Iluna-ilum, or if our previous calculations should prove correct, Iadih-abu and Mutihurshana. The chronicle continues: "A second time Samsu-iluna [went to the Sealand(?)]"; but Iluna-ilum approached and defeated him.

A tablet (P. 68) found at Nippur and dated mu-bil I-li-ma-ilum lugal-e gives evidence that Ilima-ilum, as he is called on this tablet, more correctly, actually reigned over Southern Babylonia as far north as Nippur for at least two years, but probably he ruled over these districts the last nine years of Samsu-iluna's reign. The latest Nippur tablets from the reign of Samsu-iluna are dated in the 27th, 28th and 29th years, and it is possible that Ilima-ilum took possession of Nippur already in the last mentioned year.²

No tablets of rulers of the First Dynasty from Nippur dated later than the 29th year of Samsu-iluna have come to light as yet, and although according to an oral communication by Hilprecht there exists a building inscription of Ammi-ditana from Nippur, nevertheless the absence of tablets can be sufficiently accounted for only by the assumption that Nippur was destroyed, and that for a long period all or most of the mounds of Nippur remained uninhabited.

probably assign it to this year. The occurrence of names (Abil-ilishu P.1 & Mah, 11th and 13th years; Lu-Enlilla, 12th and 13th years; Idishum, 12th year; NinIB-rahim-şirim, 13th, 20th and 27th years, Ii., 2d year, and Enlil-muballit, 23d year) would, it is true, at first sight point rather toward a year near the 13th, in which case one might identify the lugal im-gi (14th year) with Iadih-abu. But notice that NinIB-rahim-şirim occurs as late as the 27th year of Samsuluna and the second year of Ilima-ilum.

¹ P. 64.

² The 29th or 30th year would be an extreme limit, because the buryul Awilia is mentioned as early as forty years before, in the 33d year of Hammu-rabi. The last occurrence of his name on other tablets is in the 18th year. The three persons mentioned also elsewhere are Awilia buryul (4, 33; Si. 4, 11, 12, 13 and 18); Ibni-Enlil dubsar (Si. 13, 14 and 28); NinlB-rahim-sirim (Si. 13, 20 and 29 (= No. 64)). From this one could be inclined to think again of some year near the 13th or 14th; notice especially the juxtaposition of Awilia and Ibni-Enlil in Nos. 13 (13th year) and 14 (14th year). But cf. the occurrence of Ibni-Enlil in the 28th year.

The unfortunate outcome of the fight of Samsu-iluna with Ilima-ilum seems to have crippled his power for the rest of his reign. The date list informs us of another success against invaders(?) from the Westland in his 35th year, and of the suppression of an uprising(?) in Akkad in his 36th year. Particulars about these events are not known

Samsu-iluna's son and successor Abi-eshu' again made an energetic effort to get rid of the rival in the South. We learn from the chronicle that he tried to capture Hima-ilum and, therefore, even planned the damming up of the Tigris. He indeed achieved the latter work, but he did not capture Hima-ilum. The statement concerning the damming up of the Tigris is borne out by the date; "year in which Abi-eshu', the king, after in the great power of Marduk, he had dammed up the Tigris, ———."

The Tigris, or more correctly that part of the Tigris in question, is undoubtedly the Shaṭṭ-el-Ḥai, the influx of which at Knt-el-Amara Abi-eshu' seems to have diverted, thus depriving the land on the banks of the river of the life-giving power, the water. From this we may safely conclude that Hima-ilum had his stronghold in one of the cities on the banks of this canal. That Abi-eshu' succeeded in getting control of Southern Babylonia we may also conclude from his building(?) the temple E-kish-shir-yal and dedicating his statue to this temple, provided that the sanctuary in Ur is meant.

Apart from the instance mentioned above, the dates, as far as they are known at the present, furnish little material for the history of *Abi-eshu*'. From one we learn the name of a certain *Adnatum*, but are kept entirely in doubt as to the *rôle* he played. Perhaps he was vanquished by *Abi-eshu*'.

Scanty also are the data gathered from the formulas for the history of the last three kings, Ammi-ditana, Ammi-zadaga and Samsu-ditana. With rare exceptions they relate the dedication of votive objects; sometimes the building of a temple, or of a fortress. The impression is, therefore, forced upon us that the political activity of these kings was on the whole a limited one. The new political centre in the South checked the movements of his neighbor in the North. Unfortunately we have, with one exception, no positive knowledge of the continuous contest we must necessarily assume existed between the last kings of Babylon and the first kings of the Second Dynasty. The names and the number of years of the reign of these kings are known from two chronological lists, and we can thus calculate that, after Hima-ilum, the contemporary of Samsu-iluna and Abi-eshu', Itti-ili-nibi was contemporaneous with Abi-eshu' and Ammi-ditana, Damqi-ilishu with Ammi-ditana, Ammi-zadaga and Samsu-ditana, and Ishkibal and Shushshi with Samsu-ditana.

 $^{^4\,\}mathrm{We}$ know the formulas of 25 (or 26) out of the 28 years of Abi-csha'.

Perhaps we may see the traces of a continued war with changing results between the two rival kingdoms in the fact that a number of years of the reign of Ammiditana have no formula of their own, which always is a sign of turbulent times, while the immediately preceding year in all cases is marked either by some military success or by the construction of a fortress. This apparently means that Ammi-ditana several times made an attack upon foreign territory and endeavored to secure it for himself by building fortresses, whereupon the enemy very soon reconquered the lost territory or at least tried to do so. Thus the three first years of Ammi-ditana are all designated with formulas that suggest some military or political success. The fourth year, however, has no formula of its own, nor those denoting the second year after the construction of the fortresses Mashkan-Ammiditana in the 8th, Ishkun-Marduk on the Zilakum in the 31st and Dur-Ammiditana on the canal Mê-Enlil in the 34th year. Another fortress, Dur-Ammiditana on the Zilakum, Ammiditana had built in his 15th year; the construction of Ishkun-Marduk on the same river (or canal) in the 31st year, represents perhaps a renewed attempt to subdue the regions around this river. A royal castle KiKU-shaq-duqqa was built on the Arahtum canal in the 19th year.

In the 16th year Ammi-ditana vanquishes a certain Arahaum, who is called a lù-ma-da. Nothing more concerning this event is known.

A most important historical notice, however, is contained in the date of Ammiditana's last year, because it mentions the name of Damqi-ilishu, the third king of the Second Dynasty. We learn that Ammi-ditana in his 36th year conquered a fortress which Damqi-ilishu had built, exactly the reverse of what we concluded above for several years of Ammi-ditana. The political course of things in the last period of Ammi-ditana's reign seems to have been this: in his 34th year Ammi-ditana advanced towards the South and built a fortress on the canal Mê-Entil, which, judging from its name, was not very far from Nippur; in the 35th year apparently Damqi-ilishu drove Ammi-ditana back and erected his own fortress, but in the 36th year Ammi-ditana conquered this fortress,² and again extended his dominion over the South.

¹ Perhaps the Sumerian(?).

² The opinion of Ungnad that the formula does not refer to the conquest of a fortress held by the enemy, but to the razing of a wall of a fortress in *Ammi-ditana's* own possession, cannot be maintained, because a king does not boast of such an event and mark a year after it, quite apart from the fact that the kings in order to secure their dominion tried to build as many fortresses as they could. Moreover, "to destroy the wall of a city" is the technical term for "to take a city by force," "to conquer a city."

It is likewise impossible to assume that the words, "which Damqi-ilishu had built," do not refer to a contemporaneous event, but to a construction of the wall by Damiq-ilishu, king of Isin, at a much earlier time; for a wall of sun-dried bricks and beaten clay, as usually the Babylonian city walls were, would long since have been destroyed by rain and rendered unfit for the defense, even if it had not been devastated in the previous turbulent periods.

That Ammi-ditana, at least at times, actually ruled over Southern Babylonia we see from his title, "king of Shumer and Akkad," which he holds in the inscription published by King.⁴ From the same inscription we learn that he was also king of Kish, and that he had subdued the Westland.²

Anmi-zadaga received from his father, who died the year after his success over Damqi-ilishu, the dominion over Southern Babylonia. We see this clearly from the date of the first year, in which he refers to Entil who makes great his dominion, and from the formula of the second year, in which he calls himself the humble shepherd of Anum and Entil. But, perhaps, in the latter year he lost the southern part of his dominion. In his inscription the judge, Gimil-Marduk, calls Ammi-zadaga simply king of Babylon, a sure sign that he did not rule over Slaumer. In his 9th year, however, Ammi-zadaga broke, as he asserts, the oppression of his land and in his 10th year he built a fortress at the mouth of the Euphrates, which proves that in this year his power extended as far south as the Persian Gulf. From the formulas of the following years we do not receive the impression that Anmi-zadaga maintained this powerful position.

From the reign of Samsu-ditana, the last king of the First Dynasty, as yet only few date formulas are known. We may conclude that before the year whose formula mentions the great battle forces of Shamash and Marduk, Samsu-ditana won some military success, while the fact that one year was named after the preceding year, again points to some political trouble. A short notice in the chronicle, made by way of addition, informs us that at the time of Samsu-ditana the Hittites invaded Akkad. From all appearance this people made an end to the kingdom of Babylon and the dynasty of Hammu-rabi.

The short historical notice is the more valuable as by combining it with the fact that Rima-ilion is the contemporary of Abi-eshi' we are able to determine the synchronism between the First and the Second Dynasty in such a way that there is left only a play of about five years. See my tables of the corresponding rulers in "Das zeitliche Verbaltnis der ersten Dynastie von Bobylon zur zweiten Dynastie" in Z. A., XN, p. 445, and "Das zeitliche Verbaltnis der zweiten Dynastie der gosseren Koniasliste zur dritten Dynastie" in Z. A., XN, p. 145.

 $^{^{\}circ}$ Lugal du-ga m[u] kur Mar-tu^{ki} = (1 am) the king who has made the Westland obey me.

⁴ Light out of thirty.

VII. AN EARLY KING.

No. 130.

Oby.: 1. dNin -s[un(?)] ama kalam-ma dam nun(?)-[....] dam-gal $^dEn(?)$ [.....]-ni-ir(?) 2. Lugal-[....]-ni-mu-un-gin ($^{2i\cdot ku$ -rum) nitah-[kal]u-ga 3. i t-a $Nibru^{ki}$ -a ($^{2a\cdot ni$ - $in}$ Nippur-ki) lugal UD-[....]- ki -a-ge 4. lugal an-ub-da-tab-tab-ba-ge 5. i Al- i Ha- i Im- i in- i Im- i In- i In-

Rev.: 4. d Malı düg-azag-ga-ni-ta (ik -hi-a}) [.........] 6. gish-nam-GIN-gish u $^{urudu}gish$ -har-bi 5. $(^{a-na})$ 6. [UD] 7. I_3^1 bur gán a-shag \acute{e} (?)-[....] mu [......] 9. kalam-na $k\acute{a}$ -bi a-shag-ga ib(?)-ue [......]

ANNOTATIONS. To li. I. compare ^dXin-in-si-na nin-gal ama kalam-ma — nin-n-ni-ir, Warad-Sin, Stone tablet, Oby., 1–5. Should the appellation ama kalamma, common to both divinities, be an indication that Xininsima = Xinsnma? The situation of Al-Halim, li. 5, is unknown. Gur-ru-dam is here translated with u-te-ir; the formation lali-dam, which elsewhere also denotes the future, seems to become determined as to the time only by the context. To gū-kalam cf. sib gū-kalam ki-Ni-bruki, Rim-Sin, Clay, part II. As to the meaning, sib-corresponds to mi-ni-in-gi-gi, cf. gi-qi = paqidu, shullumu.—11, 6, 7 seem to form a unity, since the enclosing a stands only after the last verb.

The document No. 130, which is dated by a colophon in the reign of Ammizaduga, is the copy of a transfer of land (see Rev. li. 29) by an earlier king, probably to the temple of the goddess who is mentioned Obv. li. 1. Unfortunately the name of the king as well as that of his capital is only partially preserved. The latter, consisting of two signs, the first of which is UD, can be neither Unug nor Larsam, because of the complement a, possible readings being perhaps Adab, Larak or Upi. The Sumerian name of the king and the mentioning of the goddess Mah, who elsewhere appears associated with Anu, Ellil and Ea, seem to point towards the South, while the title, King of the Four Corners of the World, the prominent place of Nippur in the titles of the king and the names of the first two mentioned patesis, compounds with Ellil, render it probable that the king in question ruled over a territory in the centre of which Nippur was situated. But, judging from the other predicates which he assumes, his dominion extended also over districts outside of Babylonia (kurkur-ra), and over the regions north(east) of Akkad (ki-shar-ra). Akkad itself and the great southern cities are not under his rule.

As to the time of this king all indications as yet are wanting, except perhaps that the title \hat{u} -a $Nibru^{kn}$ held by Ishme-Dagan, might place him near this king of Isin, especially as after the reign of his son a usurper founded a new branch of the dynasty, and Gungunum of Ur and Larsam, who calls himself also king of Shumer and Akkad, is a contemporary and liege lord of another son of Ishme-Dagan, the time being thus a variously disturbed one.

⁴ But ef, the similar phrase u-a ^dNinni, Lugal-zaggisi, 1, 25.

VIII CONCORDANCE OF PROPER NAMES.

Abbreviations.

b., brother; c., cousin; d., daughter; f., father; gd., granddaughter; gf., grandfather; gm., grand-mother; gs., grandson; h., husband; m., mother; n., nephew; s., son; S., seal; si., sister; n., uncle; w., wife. Determinative; d., deus, dea. † denotes feminine names.

3. f. of Mannummeshulişur, 38: 10, 64: 5.

⁴ On bushti in female names see Ranke, P. N., p. 224.

² H. R. 50: 12c, ^d(shu-ba) Shuba. The bi in 54: 29 seems to be rest of an erasure, not phonetic complement to sub(a).

Notice the frequent an-azay-ga (shamê ellûti), e.g., Warad-Sin, Stone tablet, Obv. 4, and an-azay-gi, Warad-Sin, clay cone, 1:3.

Compare A.N-BA-NI-NI (C.T., XIII, 41, Oby, 48), which probably is likewise Sumerian, concluding from the names of the wife and the sons of this king (perhaps AN BA-zal-zal). Does the name An-nu-ba-NI-NI (cf. inscription of this king) suggest a reading anu-ba for AN-BA?

⁵ Cl. An-ni-ba-UL, Ur-ri-ba-UL and Ur-ri-ba-ab-UL, Reisner, Telloh.

8. of Erishsumatum, b. of Abil-Martu, Libit-Enlil (and Abil-Shamash?); u. of Libit-Martu, 32 - 18, 8, 1 33 ; 3, 5, 14, 8, 1 35 ; 2, 48.

Ma-ru-ut-Ishtar

s, of Sin-lidish, 18: 12,

Mi-gir- dEn -lil

f. of Narubtum, s. of Naramtum, 23: 8, 49, 20.

Mu-mu-he-qub (my name he may establish; cf. Shamosh-sham-ukin)

gala, 26, IV: 19,

Wu-mu-ni-pad (my name has been called)

nu-esh, 13 + 28 - 11 + 18.

Mu-mu-mi-rum

s of Damgum, 13:13.

Mu-tum-ilum

1. s. of Dumu-idinnam and Hidutum, 41:5.

2. s. of Ishkur-rabi, b. of Mar-irgitim, n. of Ududu, c. of Ishkur-qirra and Ibgatum, 10:1, 31 | 30:16.

Na-bi-ia

*f. of Elali, 7:22.

Na-bi- dEn -lil

s. of Idatum, 47: 20 | 58: 19.

**2. f. of Ea-masir, 8:28,

*3. f. of Ibi-Ninshah, 7:20.

1. f. of Sin-cribam, 21:33.

Va-bi-d Shannash

s. of Imgûa, 11 : 6, 11, 17, S. | 23 : 25.

*2, s. of Ur-Ennugi, b. of Ahushunu and Zintum, 7:8.

3, 1, of Idin-Ishtar, 51:2, 3.

17:3 | 21:3, 1 | 25:3 | 27:1; probably identical with No. 3; cf. Idin-Ishtar, 27:3.

 $Na^{-d}En$ -lil

s. of NinIB-mushallim, 68: 22.

2. 27:9.

Num-ma-ni-ni-shag (his fate is bright)2

f. of Lu-Nannar, 10: 16.

Nam-ra-am-shu-ru-ur

f. of Suhuntum, 45:7.

Num-rum-i-li3

f. of Nur-Shamash, 62 : 22.

 $^dNannur-\dot{a}$ -duh (Nannar is a helper)

1. f. of Lugal-EZEN

2. f. of Lu-Enkiga, 49:21.

d Nannar-a-rá-mu-un-gi-en (seal seems to omit -en; Nannar made the way steady)

s. of Ninni-mansi, b. of Enlil-lu-shay, Ur-Duazagga and Ur-DUN-PAra, 26, II: 20 | III: 4, 11, 27.

d Nannar-ihila-ma-an-si (Nanuar has given me an heir) nu-ish, 43: 26.

d Nannar-ma-an-si

*1, s. of Belum, 6:22.

2. s. of Dingir-mansi, 30: 6.

3. f. of Shumum-lihshi, 49: 7, 8.

1. shutug, 11:22.

⁺ MAR TU, perhaps mar urn, although the form of TU does not seem to allow a reading urû; but cf. a-ma-ru mar urn φ mar urn, a ma urn) = abûbu, kur mar TU = Amarru.

² C1. Girni-ni long.

³ To the ending um compare Zanquin Warad Sin (a lord is Warad-Sin¹), P. N.

```
d Nannar-na -DI
```

*s, of Pahahum, 5:21.

d Nannar-lii-ti

1. f. of Sin-abushu, 12:2.

*2, f. of , 1 : 29.

d Nannar-sha(a)-lá-sú (Nannar is merciful) 50 : 13.

 $^{^{\}circ}$ To the Verschleifung of I compare $Etchi\text{-}Sin, \, p. 00$

⁷⁷²c shows BAD_c but 72a 17c case, and 72b 15 show more correct forms, the latter and 72 case ASH + inverted 48H, the former 48H + inverted and inclined 48H. It is one of the signs that have been confounded into the one sign BAD, but it can neither be identified with R. E. C. 41 nor 278. For x-an-na cf. perhaps Br. 1514 = malika, but more likely $\vec{E} \propto aa \cdot na$ is "the house of the of heaven."

³ Cl. Ha-ap-pa-tum, P.IN.

```

¹ Cf. Nu-úr-dNin-BUR(?), II. 28: 24.

² It seems that SIG was always read ibik, and ibku only when followed by ku; cf. Ibku(-ku)-Sin, s. of Lugal-dBabbar, B. E., Series A. VI, 1, 58; 23, and Ib-ku-dSin, s. of Lugal-dBabbar, ibid., 60; 2; Ibiq-Ishtar, s. of Ku-ta-tum, M. 30; 29, and I-bi-iq-Ishtar mör Ku-ta-tum, case.

³ Instead of I-di-shum the tablet gives the name Shum-mac^dShamash. Evidently both names are abbreviations of Idi-shumma-Shumash "I know when Shamash "
